BL GROUP

Sustainable pest control: we believe

Today pest management, in respect of biodiversity and natural and animal heritage, thanks also to the development of eco-sustainable products, is able to contribute to the achievement of the common goal which is the **conservation of our planet and environmental protection.**

The customer at the center. Always

We study what the market is looking for and we are close to the customer accompanying him from the first contact, to the support in the field, to after-sales, to professional training. Our sales network is made up of trained technicians who provide personalized technical support. We guarantee a personalized and fast delivery service for our products and equipment. **We distribute our products in over 45 countries around the world.**

Research and Development Division

Innovation will be our strength and was created with the aim of developing and placing increasingly **sustainable products** on the market, ensuring the health and **safety of people and the protection of the environment.** Two production units at work to satisfy the requests of over 100 public bodies, municipal companies and over 900 Professional Pest Management Companies.

Product safety guarantee

We continuously work to ensure safe products with tests carried out by independent laboratories that demonstrate their effectiveness and effects for humans, animals and the environment. Our regulatory office controls and verifies the issue of products on the market **on a daily** basis and provides support to all our customers.

BLEULINE®

Bleu Line has its Head Quarter and its Export Offices in Forlì and the Operative and Development Unit in Corsico (Milan). Bleu Line operates in all over the world thanks to a widespread network of Export Area Manager supported by Technical-Scientific Department and Help Desk to provide any type of information that ensures close proximity to distributors.

We have made a significant effort to identify and collaborate with the best international partners specialized in the production of systems, technologies and accessories for Integrated Pest Management. The goal was to create synergies with Partners that could provide tools at the same quality level as the products PMC and Biocides that Bleu Line - B.L. Group produces and distributes in over 45 countries.

Also in view of the expansion of the Group and in particular in foreign markets, we decided to open a branch in Romania: **"Blue Line Export"** where there are currently offices and logistics and where the possibility of implementing other activities in the future is not excluded.

CERTIFICATIONS

Bleu Line has always pursued a Company Policy that aims at a complete service for the Customer and that improves the name and prestige of the Company. The company, in addition to providing a quality service, research the best ways to help Customers solve their problems, providing them with technical support and expertise.

CERTIFIED QUALITY SYSTEM ISO 9001:2015

CERTIFIED TRAINING SYSTEM ISO 21001:2019

The General Management of Bleu Line, since many years, has adopted a Policy that's oriented to a complete fulfilment of the needs of the Customer.

The Company, in addition to providing high-quality products and services, researches the most innovative solutions to the tasks and problems in integrated pest management, providing technical support and expertise. The entire staff is committed to the achievement of strict objectives and contribute to the overall strategy for quality.

In this context, the Quality Management System (QMS), in compliance with ISO 9001:2015, is the guideline of the company in the improvement of its overall performance.

Moreover, Bleu Line provides know-how to pest control operators by providing courses and training in compliance with ISO 21001:2019. All colleagues operate in self-control, respecting the shared operative instructions of the Quality Management System.

INSECTICIDE - ACARICIDE FOR PROFESSIONAL USE
IN CIVIL AND DOMESTIC AREAS
Italian Ministry of Health Reg. no. 20925

COMPOSITION

Active substances, individual protective equipment, symbols of danger

Composition

Permethrin	3,72%
100% pyrethrum (<i>Chrysanthemum cinerariaefolium</i> , extracted from open and ripe flowers of <i>Tanacetum cinerariifolium</i> obtained with hydrocarbon solvents (Pure pyrethrins)	1%
PBO	9,40%

CHARACTERISTICS

Description of product. In case of equipment the characteristics of the device

Insecticide-acaricide with knocking down action for indoor and outdoor use applicable in civil, domestic and industrial environments. It is applicable in indoor and outdoor environments, including green areas.

DOSAGE AND USE

The method of use and the method of application of the product shall be indicated

Dosage and Use

- **Against mosquitoes, including the tiger mosquito:** dilute in water at 0.8% (80 ml in 10 L of water) at the moment of use; one liter of solution is suitable to treat 10 m².
- **Against ticks, Asian bugs:** dilute in 1% water (100 ml in 10 L of water) at the moment of use; one liter of solution is suitable to treat 10 m².
- **Against wasps:** dilute in 1% water (100 ml in 10 L of water) at the moment of use; one liter of solution is suitable to treat 10 m².
- **Against flies:** is used mixed in water at 1.5% (150 ml in 10 L of water) at the moment of use; one liter of solution is indicated to treat 10 m².

TARGET INSECTS: ticks, Asian bug, mosquitoes, tiger mosquito, flies, wasps.

APPLICATION FIELDS: civil, domestic, industrial, agricultural, rural environments and means of transport, green areas for the mosquito control.

AVAILABLE SIZES

Bottle: 1L in box of 6 pcs.
CODE: 1-2-357-1X6

Tank: 5 L
CODE: 1-2-357-1X5

PRODUCT INFORMATION

New product

Non Tossic

Product Made with recycled material

Solvent-free concentrate. Indicates a water-based insecticide preparation. L.E.I. range (LOW ENVIRONMENTAL IMPACT) line of insecticides with low environmental impact.

Solvents of plant origin. Indicates an insecticide preparation formulated with solvents of plant origin, with low environmental impact. L.E.I. range (LOW ENVIRONMENTAL IMPACT) line of insecticides with low environmental impact.

A detailed photograph of a mosquito is centered at the top of the page. Below it, a large green circle contains the text 'ECOLOGICAL CONTROL'. The bottom half of the page shows a dense collection of mosquito larvae in water. The background is white with several light green and grey rounded rectangular shapes.

Pg. 12 **NATURAL DETERRENTS**

Pg. 14 **REPELLENTS**

Aquatain AMF® and Aquatain Drops

UNIQUE AND ECO-FRIENDLY.

AQUATAIN AMF® is a unique, product to control mosquito larvae. Is a liquid product containing silicone (*polydimethylsiloxane - PDMS*) which can easily be applied to the surface of stagnant and standing water; it forms an ultra-fine film on the surface which covers the whole extension. AQUATAIN AMF® is a product authorised for free sale - **no registration necessary** - in all European Union countries, Switzerland, Brazil, Australia, New Zealand. No resistance cases have been registered.

AQUATAIN DROPS is a product in water-soluble capsules (made of vegetable-based material) that contain AQUATAIN AMF® which "emulates" the use of common larvicide tablets. Both products may be bought freely - without any registration - in Italy, the European Union and other countries. AQUATAIN DROPS, in fact, are not considered a biocide for the purposes as they implement a physical-mechanical action, long-lasting and effective for at least 4 weeks. There is no possibility of developing any resistance phenomena.

Safe for the environment

Exclusively produces a physical-mechanical type of action and does not contain any potentially toxic component. It prevents larvae and pupae from taking in the oxygen they require to develop into adults, causing them to suffocate as a result. In fact, the low surface tension of the silicone film prevents larvae and pupae from attaching to the surface of the water in order to take in the oxygen from the air that they need to survive.

Moreover, studies have shown that the low surface tension also has an impact on spawning: adult females do not lay their eggs on water that has been treated with AQUATAIN AMF® and should they come into contact with the silicone film whilst laying their eggs, they would become trapped and die. This way, the entire life cycle of the mosquito is blocked.

Aquatain AMF®

Composition

Polydimethylsiloxane (PDMS silicone) 89%

Dosage and Use

Apply 1 ml undiluted product per m² of water surface. Apply 1-5 ml (recommended dose 2 ml) of product as such for each manhole, water trap and road sewer cover, according to the organic matter present.

50 ml bottle for non-professional use:

- 1 ml undiluted product per m² of standing water surface.,

TARGET INSECTS: Larvae mosquito.

APPLICATION FIELDS - PROFESSIONAL USE:
Still and stagnant waters, manholes, wolf mouths.

RECOMMENDED EQUIPMENT:
Larvatic 2.0 (pg. 11),
Dozen - Aquatain (pg. 11)

AVAILABLE SIZES

Bottle: 50 ml in a 48 pcs.
CODE: 1-274-1001-2021

Bottle: 1 L in a 6 pcs.
CODE: 1-274-1001-1X6

The only effective product in Europe in the control of mosquitoes exempted from biocidal registration.

Is not a biocidal product for purposes of Article 3, paragraph 1, letter a, of Council Regulation (EU) No. 528/2012 (Implementing Decision (EU) 2015/655 of the Commission of 23 April 2015).

AVAILABLE SIZES

Tank: 10 L
CODE: 1-274-1001-1X10

Aquatain Drops

READY-TO-USE PRODUCT IN CAPSULES
FOR ECOLOGICAL CONTROL OF THE MOSQUITO'S LIFE CYCLE

Composition

Aquatain Drops contains 0.25 ml of Aquatain AMF.
(Polydimethylsiloxane – PDMS/silicone 89%)

Dosage and Use

- Small amounts of standing water (saucers under plant pots, pots, etc.): use 1 capsule.
- Medium amounts of standing water (domestic drains in courtyards, guttering, etc.): use 1-4 capsules according to the amount of organic matter present.
- In general, use 4 ml capsules per m² of standing water surface.

The capsules dissolve in water within 1-4 hours, according to ambient temperature. No specific personal protective equipment is required.

TARGET INSECTS: Larvae mosquito, Tiger Mosquito.

APPLICATION FIELDS: Domestic use, plantpot saucers, wells, domestic drains, gutters, drainage canals, water tanks, water containers, tyres, etc.

AVAILABLE SIZES

Case of 15 drops (1 blister of 15 drops) in box of 100 cases.

CODE: 1-274-1X15-2021

Case of 30 drops (2 blisters of 15 drops) in box of 100 cases.

CODE: 1-274-2X15-2021

Aquatain Blocks

SOLID FORMULATION BASED ON AQUATAIN AMF®,
LONG-LASTING, FOR MOSQUITO CONTROL IN DOMESTIC
CONTEXTS

Composition

Contains polydimethylsiloxane

This product is for residential use in small bodies of still and stagnant water. Once applied, the product forms a thin, silicone film on the surface of the water, which gradually releases polydimethylsiloxane, preventing larvae and pupae from receiving the oxygen they need to develop into maturity.

The film also prevents mosquitoes (larvae and pupae) from developing correctly during immaturity. The product uses a physical-mechanical mechanism and is effective for at least 2 to 3 months.

Dosage and Use

If treating small bodies of water (flowerpot dishes, tyres, etc...) break off 1 block from the slab along the pre-marked lines.

In general, 1 block can be used to treat around 0.25m². If you need to treat a larger body of water, use more blocks in proportion to the area to be treated.

TARGET INSECTS: Larvae mosquito, Tiger Mosquito.

APPLICATION FIELDS: Domestic use, manholes, storm drains, wolf vents, standing water, pools.

AVAILABLE SIZES

Blister: 35 g (consisting of 8 blocks in tablet)
in box of 100 blisters

CODE: 1-274-1001-1

Larvamic 2.0

SPECIFIC FOR THE SUPPLY OF AQUATAIN AMF®

Sprayer for ready-to-use and concentrates formulations. Specifically, it was designed and built to be used with Aquatain AMF®. However it can also be used with other formulations. It is particularly suitable for the application of the product in storm drains, vents and grills.

Equipped with a 2 l tank, it is specific for the application of ready to use and concentrated products, dispenses from 1 to 5 ml of product or solution.

It is equipped with an ergonomic aluminium lance with a dispensing button, a horizontal extension of 40 cm, an operator signal LED and an acoustic signal at the end of the dispensing. In the package there is also a modular nozzle, specific nozzles for treatments in grills and mouths and nozzle cover.

Features

- **Adjustable dispensing:** from 1 ml
- **Product application time:** 140 ms
- **GPS installed**
- **Battery Charge:** built-in over 1000 charging cycles
- **Applications for battery charge:** 1500 approx
- **Weight with 2 l of product:** about 7 kg

APPLICATION FIELDS: Manholes, storm drains, hopper, grills.

PACKAGE

Larvamic 2.0: Single pcs.
CODE: 4-1-102-2.0

Dozen - Aquatain

MANUAL SPRAYER FOR THE SUPPLY OF AQUATAIN AMF®

The pre-compression sprayer Dozen is the ideal tool for spraying and nebulising disinfection products. It is equipped with a 12 liter container and a pressure relief valve regulated at 6 bar.

The pump can be carried comfortably on the shoulder like a backpack. Equipped with plastic handle, extension and brass nozzle and specific volumetric dispenser from 2 to 25 ml capable of dosing the correct quantity of liquids, such as Aquatain in manholes. The Dozen pump features a 115 mm diameter filling port, and the net weight of the pump is only 3kg.

Suitable for anti-larval treatments with Aquatain in small contexts, as it combines spraying precision with an excellent quality / price ratio.

Features

- **Spraying:** 6 bar
- **Tank capacity:** 12 liters
- **Empty weight:** 3 kg

APPLICATION FIELDS: Manholes, storm drains, hopper, grills.

PACKAGE

Dozen - Aquatain: Single pcs.
CODE: 4-1382-DOZEN

BL Natural Moles

FILM-FORMING BARRIER TO REMOVE MOLES

Ready-to-use oil-gel deterrent formulation for banishing moles. Completely eco-friendly (vegetable matrix) and non-toxic for pets, farmyard animals or livestock, it tends to create a foul smell in the sites frequented by moles, making these unbearable not only for moles, but also for annelids and for the insects they feed on. It is not food bait.

Dosage and Use

As it is in the areas concerned. 1 litre of product is sufficient for approximately 20 linear m applications

TARGET: Moles.

APPLICATION FIELDS: meadows, cultivated areas, vegetable gardens and gardens.

AVAILABLE SIZES

Tank: 5 L

CODE: 41-1-NTA-1X5

BL Natural Reptiles

FILM-FORMING BARRIER KEEPING REPTILES AWAY

Ready-to-use gel deterrent formulation for banishing reptiles. Completely eco-friendly (vegetable matrix) and non-toxic for pets, farmyard animals or livestock, applied in the relevant areas to be protected from reptiles, it ensures access is unwelcome and therefore drives away reptiles. It is not food bait and does not kill the reptiles.

Dosage and Use

As it is: Pour the mixture in a zigzag manner along the paths where you want to avoid the presence of reptiles (a litre is enough for 15-20 metres). Residual value: 15 days.

TARGET: Snakes, lizards, geckos.

APPLICATION FIELDS: Parks, gardens, lawns, dwellings, farmhouses, farmhouses.

AVAILABLE SIZES

Tank: 5 L

CODE: 41-1-NR-1X5

BL Natural Mouse

FILM-FORMING BARRIER KEEPING MICE AWAY

Ready-to-use product based on components of natural origin (*Olea europaea*) and a mix of synergetic essential oils. The product forms a filming barrier that keeps mice and rats away. The ground and the dens where the product is used (according to the methods of use) create a natural and impassable barrier that keeps them away from that place forever. Ideal for companies and / or food stores because it does not cause the death of the rodent, but frees it from its presence, avoiding all the related problems of toxic infection.

Dosage and Use

As it is: 1 litre of product is sufficient for approximately 20 linear m applications. Apply every 15 days.

TARGET: Mice, rats, voles.

APPLICATION FIELDS: warehouses, tool sheds, food stores, hospitals, kindergartens, schools.

AVAILABLE SIZES

Tank: 5 L

CODE: 41-1-NTO-1X5

Move away without harming

Frontiera AT **NEW**

INSUPERABLE PHYSICAL BARRIER FOR SNAILS AND SLUGS

Composition

Natural attapulgite

GLOVES

READY TO USE GRANULES

The mineral of the granule is naturally occurring and it is extracted in Mediterranean mines. Its physical properties make its surface impassable to slugs and snails. The crystalline structure of this inert mineral – absorbent and with uneven vivid edges – is a substrate that gastropods find hard to cross.

Frontiera AT is a physical barrier that keeps slugs and snails away, by mechanical action, from the plants they feed on. The granules are rainfast and keep their properties unaltered for weeks. Slugs and snails are not killed, but left outside the zone fenced with the barrier. Frontiera AT avoids that slugs and snails reach the plants inside the treated perimeter and feed.

Dosage and Use

Ornamentals and vegetables: Distribute the product around the perimeter to protect, making a line 3-5 cm wide. Dose: 200 gram per linear metre of perimeter.

Flowerbeds and potted plants: Distribute the product around the border or outside the pot or flowerbed, making a line 3-5 cm wide around the pot or flowerbed.

Single plants can be protected in the younger phase of development. The granules are resistant to weather and rain, and do not lose efficacy. Once the protective activity is not necessary any more, the granules can be incorporate into the soil by ploughing or hoeing, improving permeability and transpiration of the soil.

Resistant to weather and rain.

TARGET: Snails, slugs, mold and vegetation removal.

APPLICATION FIELDS: Public parks, private and public gardens and flowerbeds, grass, vegetables, green areas.

AVAILABLE SIZES

Bucket: 1 kg in box of 6 pcs.

CODE: 1-2953-FAT-1X6

No Flying Insects **NEW**

INSECT-MITE REPELLENT READY TO USE
FOR ENVIRONMENTAL TREATMENTS SPRAY NO GAS
FOR PROFESSIONAL USE AND AMATEUR

Italian Ministry of Health Reg. no. 20633

Repels insects away
from the environment

Composition

Geraniol 0,5%

**UNIQUE PMC REGISTERED
FOR OUTDOOR**

The product is water-based and contains Geraniol, a plant-based active substance, and repels dust mites, ants, tiger mosquitoes. Thanks to its particular composition developed by our Company, it lasts up to 24 hours, releasing a pleasant fragrance in the treated spaces.

Our labs developed a specific formulation acting up to 24 hours and leaving a nice fragrance in the environment.

Dosage and Use

Shake well before use. Spray from about 30 cm on surfaces such as windowsills, skirting boards, edges, jambs, cracks, under sofas, carpets or in general in transit areas or where insects settle. One litre of ready-to-use product covers an area of 59 m².

When used on greenery, cover the vegetation evenly avoiding dripping.

TARGET: Tiger mosquito, ants, domestic dust mites.

APPLICATION FIELDS: Living areas, in public and community places, Resort areas, Production areas, transports for people, animals or goods. Fields of use in sewage plant, sewers, landfills and waste disposal areas. In green areas, such as hedges, gardens, tree-lined avenues for the control of tiger mosquitoes.

AVAILABLE SIZES

Tank: 10 L

CODE: 41-1391-NOFLY-01

No Flying Insects Plus **NEW**

LIQUID INSECT REPELLENT FOR ENVIRONMENTAL TREATMENTS OF CIVIL AND ZOOTECHNICAL AREAS - PROFESSIONAL USE
Italian Ministry of Health Reg. no. 20767

No Fly Insects Plus is particularly used in agricultural and zoo-technical areas

Composition

Geraniol 2%

GLOVES

GLASSES

MASK

SUIT

ATTENTION

The product, water-based liquid formulation, contains Geraniol, a plant-based active substance, and performs a repellent activity against domestic insects such as mosquitoes, tiger mosquitoes, flies and red mites.

Our labs developed a specific formulation acting up to 24 hours and leaving a nice fragrance in the treated environment.

Dosage and Use

Shake well before use. Dilute the product according the following proportion and the corresponding purpose:

- **Against mosquitoes:** s diluted 1:5 with effect up to 24 hours.
- **Against red mites:** diluted 1:4 with effect up to 24 hours.
- **Against flies:** as it is or diluted 1:2 with effect up to 24 hours, diluted 1:4 with effect up to 1 hour.

TARGET: Tiger mosquito, flies, poultry red mite.

APPLICATION FIELDS: Professional use, urban spaces, producing areas, agricultural areas and settlements, port and airport areas, landfills and waste storage.

AVAILABLE SIZES

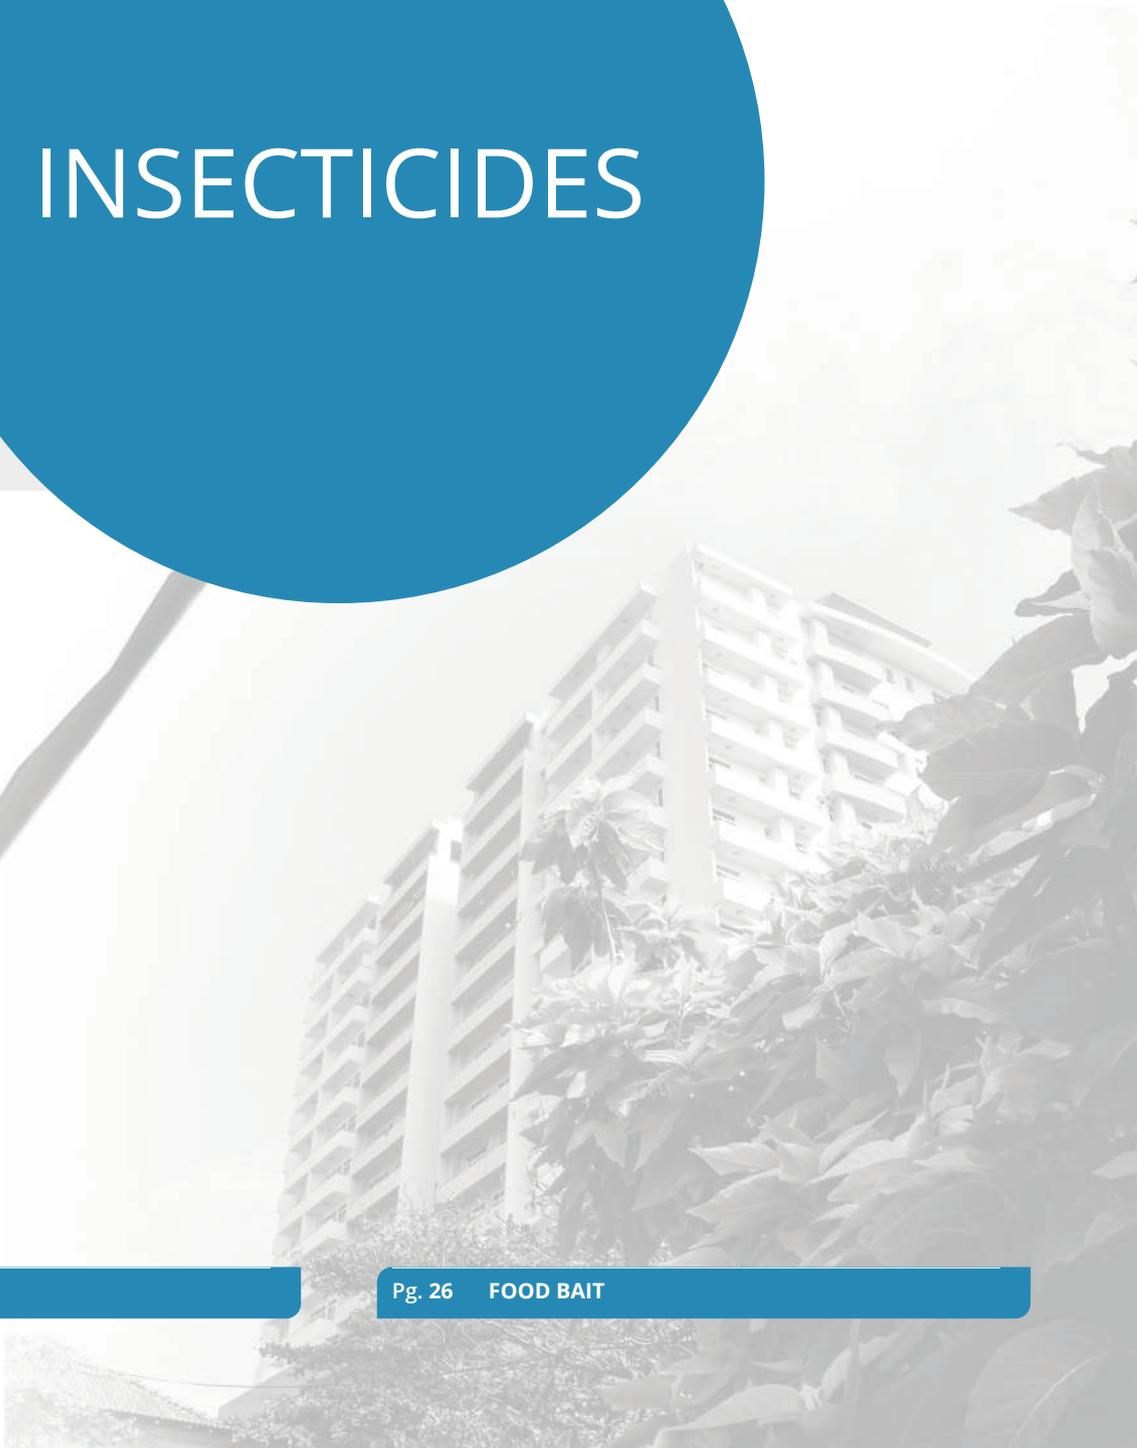

Tank: 5 L

CODE: 41-1391-NOFLY-03

INSECTICIDES

Bleu Delta

INSECTICIDE ADULTICIDE IN CONCENTRATED SUSPENSION
BIOCIDE (PT18)

Italian Ministry of Health Authorisation no. IT/2017/00404/AUT

Composition

Deltamethrin 2,5%

Broad spectrum insecticide, containing 25 g/L deltamethrin, designed for the control of a wide a range of domestic and industrial insect pests. For indoor use only with high knocking effect and residual tested up to 4 weeks.

The residual efficacy is variable according to the type of surface on which it is applied. It's indicated for the control of crawling insects (Cockroaches, *Blatta orientalis* and *Blatta germanica* and ants, *Lasius niger*).

Dosage and Use

Dilute 500 ml in 100 liters of water and distribute through a pressure pump using 1 liter of solution per 10 square meters of surface.

TARGET INSECTS: Ants, cockroach.

APPLICATION FIELDS: For indoor use only in civil and domestic environments.

AVAILABLE SIZES

Bottle: 1 L in box of 12 pcs.
CODE: 1-1003-1X12-BIO

Tank: 5 L
CODE: 1-1003-1X5-BIO

Tank: 10 L
CODE: 1-1003-1X10-BIO

Deltatrin Flow 2,4

INSECTICIDE ADULTICIDE IN CONCENTRATED SUSPENSION
Italian Ministry of Health Reg. no. 16264

Composition

Deltamethrin 2,4%
Tetramethrin 0,5%

Insecticide adulticide with a residual action for a long period and indicated for civil, industrial and domestic places. It can be used against flying insects. Broad range insecticide, acts with a very low dose of active ingredient per square meter of surface (10-12 mg/m²) due to the presence of a pure isomer. This allows to obtain an optimal disinfestation respecting the environment. It can be applied also in food industries and animal areas.

Dosage and Use

- **flying insects and crawling insects:** 0,3% - 0,5%

One liter of this solution can be used for 10 sqm areas by means of the common sprayers, manual pressure pumps, or motor-driven sprayers. Warning: when using in animal quarters, housings or kennels, move the animals away during the whole treatment and wait until the solution is dry before letting them in again.

TARGET INSECTS: Flies, mosquitoes, tiger mosquitoes, simuliidae, moths, blowflies, wasps, ants, cockroaches, flour moths, wheat weevils, beetles, mites.

APPLICATION FIELDS: Food industries, organizations and communities, industrial, civil, means of transport, zootechnical environments.

AVAILABLE SIZES

Bottle: 1 L in box of 6 pcs.
CODE: 1-4-602-1X6

Tank: 5 L
CODE: 1-4-602-1X5

Permex 22 E®

CONCENTRATED LIQUID INSECTICIDE
FOR CIVIL AND DOMESTIC USE

Italian Ministry of Health Reg. no. 14318

Composition

Permethrin tec..	12,36%
Tetramethrin	1,64%
PBO	6,40%

Aqueous microemulsion insecticide whose active principle is the association of two synthetic pyrethroids: permethrin and tetramethrin synergized with piperonyl butoxide, granting a quick killing action and prolonged residual action.

Dosage and Use

PERMEX 22 E® must be mixed with water when used, at the ratio of 0,3-1% (30-100 ml for 10 L water) according to the pest extent. One liter of this solution is suitable for 10- 15 sqm surface and can be used with any type of standard sprayer: manual pressure pumps, motorised atomizers. **For treatment of green areas** it is recommended to spray the vegetation evenly, avoiding any dripping. PERMEX 22 E® may also be used at the ratio of 3% with glycol-based solvents (300 ml in 10 L solvent) with cool or warm mist blowers for delimited environments, at the ratio of 0,5-1 liter of solution per hectare of surface or 0,5-2 liters per 1.000 cubic meters.

TARGET INSECTS: flies, mosquitoes, cockroaches and other insects.

APPLICATION FIELDS: public health, Food industry, tobacco industry, means of transport.

AVAILABLE SIZES

Tank: 5 L
CODE: 1-30-42-1X5-NEW

Tank: 10 L
CODE: 1-30-42-1X10

Pertex **NEW**

AQUEOUS MICROEMULSION - INSECTICIDE
Biocidal product (PT18)

Composition

Permethrin	3%
PBO	0,053%

Aqueous Microemulsion Insecticide for professional and trained professional users.
Application with spraying. Surface treatment by band application uniformly on the ground near the walls and on the walls at a maximum of 50 cm height with pump sprayer.

Dosage and Use

To be used indoor and outdoor on porous and non-porous surfaces, with a final dilution of 2% v/v (2 L of con-centrated product in 100 L of water).
1 L of product solution is used for the treatment of ap-prox. 11.7 m² surface.

TARGET INSECTS: Sheep tick (*Ixodes ricinus*), adults.

APPLICATION FIELDS: indoor; outdoor around buildings; indoor rural hygiene (animal houses/shelters).

AVAILABLE SIZES

Bottle: 1 L in box of 12 pcs.

Cimex

RESIDUAL LIQUID INSECTICIDE
READY TO USE
Italian Ministry of Health Reg. no. 20147

Composition

Pure Permethrin	0,15%
Pure Tetramethrin	0,06%
PBO	0,30%

Adulticide insecticide with a quick killing action and prolonged residual action thanks to the association of two synthetic pyrethroids: permethrin and tetramethrin. Product in aqueous formulation specially designed for domestic use with mechanical nebulizer. It is odorless and no contains organic solvents. It is very useful against mosquitoes (*Culex pipiens*, *Anopheles spp.*), tiger mosquitoes (*Aedes albopictus*), flies (*Musca domestica*) and other flying insects, as well as crawling insects such as cockroaches, ants, silverfish, weevils, tribbles and other harmful or nuisance arthropods such as spiders and bed bugs. It is therefore useful for use in domestic environments.

Dosage and Use

Distribute as it is in the ratio of 1 liter for 15-20 sqm

TARGET INSECTS: mosquito, fly, cockroach, silverfish, bed bug

APPLICATION FIELDS: domestic, civil, industrial and rural environments

AVAILABLE SIZES

Tank: 5 L
CODE: 1-CIMEX-5

Fly Fog

READY-TO-USE INSECTICIDE FOR PROFESSIONAL USE
Medical and Surgical Aid Health Ministry Registration n° 7018

Composition

Tetramethrin	1%
PBO	4%

The product is ready-to-use. It is used against flying and crawling insects like mosquitoes, Asian tiger mosquitoes, flies, chironomids, fleas, simuliids, moths and crawling insects like cockroaches, ants, tribbles.

Dosage and Use

The product is ready-to-use and the dosage to be used is 1 litre every 2000 m³ or 100 m² of surface. For outdoor treatments against mosquitoes it can be diluted with petroleum based solvent at 20-25% ratio and used with the suitable sprinklers or thermofoggers. Against fleas, the product must not be used on the animal but it has to be used in the environment where dogs or cats stay. Move the animals away during the whole treatment and wait until the solution is dry before letting them in again.

TARGET INSECTS: mosquitoes, flies, chironomids, fleas, simuliids, moths, crawling insects like cockroaches, ants, tribbles.

APPLICATION FIELDS: mosquitoes in gardens, meadows, ornamental bushes, hedges and tree-lined roads.

Microfly

INSECTICIDE-ACARICIDE LIQUID IN MICROCAPSULES

Italian Ministry of Health Reg. no. 14777

Composition

Pure Cypermethrin 10%
 Pure Tetramethrin 0,1%

GLOVES	GLASSES	MASK	SUIT	WARNING

Concentrated insecticide-acaricide where the active ingredients (cypermethrin and tetramethrin) are contained in micro beads (capsules) dispersed in water and without solvents. Microcapsules give the formula its lasting action and eliminate unpleasant odours. It is recommended against mosquitoes, bedbugs, ants, ticks and large roaches, inside and around buildings. It can be successfully used in the disinfestation of civil, industrial and farm buildings, in animal shelters (when no animal is present), warehouses and equipment, rolling stock and other means of transport.

Dosage and Use

- **Tiger mosquitoes:** dilute to water to 0.5% (50 ml in 10 L water) at the time of use and apply using a pressure pump. One litre of solution serves to treat a surface area of 15 m².
- **Large cockroaches, ants, bedbugs and ticks:** dilute to 1% (100 ml in 10 L water) at the time of use and apply using a pressure pump. One litre of solution serves to treat a surface area of 20-21 m².

TARGET INSECTS: tiger mosquitoes, bedbugs, ticks, ants, roaches.

APPLICATION FIELDS: Buildings for civil use, inside and around buildings, industrial buildings, agricultural buildings, pet accommodation, means of transport.

AVAILABLE SIZES

Bottle: 1 L in box of 12 pcs.

CODE: 1-30-37-1X12NEW

Freedom P.U. 15/15

READY-TO-USE LIQUID INSECTICIDE WITHOUT SOLVENTS

Italian Ministry of Health Reg. no. 18933

Composition

D-Allethrin	0,15%
1R-trans Phenothrin	0,15%

Liquid insecticide with rapid knock-down action. The product is ready to use and does not need any dilution. It must be distributed by mechanical nebulizer. It is used in domestic, civil and industrial environments and zootechnical and is effective against flying and crawling insects such as flies, mosquitoes, cockroaches.

Dosage and Use

As it is.
For normal size environments, it is sufficient to operate the dispenser continuously for 10-15 seconds on the surfaces to be treated.

TARGET INSECTS: fly, mosquito, cockroach.

APPLICATION FIELDS: domestic, civil and industrial environments and zootechnical.

AVAILABLE SIZES

Tank: 5 L
CODE: 1-1-220-1X5

Freedom PU

READY-TO-USE LIQUID INSECTICIDE-ACARICIDE
IN ACQUEOUS FORMULATION

Reg. Min. Sal. n° 20604

Composition

1R-trans Phenothrin	0,14%
Prallethrin	0,14%

Fast-acting insecticide-acaricide in aqueous formula. Recommended for non-residual treatments. The product can be effectively used to control the mosquitoes in the treatment of green areas such as hedges, gardens. The product is effective as an acaricide against ticks, both for indoor and outdoor use.

Dosage and Use

The product is ready to use and does not require dilution. It is distributed with spray gun or ordinary sprayer, manual pumps or atomizers, taking care to aim the spray into the area and away from people. After distribution, keep the room closed for about 10 minutes, then ventilate thoroughly until there are no traces of the smell of the insecticide; return the area to its original state.

- **Against mosquitoes, tiger mosquito, sand flies, fleas and ants:** 1 L of product is recommended to treat a surface area of 50 m².
- **Against ticks:** 1 L of product is recommended to treat a surface area of 45 m². When treating green areas for mosquitoes, it is recommended to wet the vegetation evenly, avoiding any dripping.
- **Against flies and beetles (cockroaches):** 1 L of product is recommended to treat a surface area of 45 m².

TARGET INSECTS: mites, fleas, ticks, flies, mosquitoes, tiger mosquito, sand flies, ants, red ants, cockroaches.

APPLICATION FIELDS: home, civilian, industrial and livestock breeding, ornamental shrubbery, lawns.

Musca Blu

INSECTICIDAL BAIT FOR FLIES WITH SEXUAL ATTRACTANTS
DOUBLE EFFECT OF FOOD AND SEXUAL ATTRACTION

Italian Ministry of Health Reg. no. 19550

Composition

Acetamidrid	0,5%
(Z)-9-trichosene	0,06%
Cheese	1%

GLOVES

GLASSES

SUIT

Granular insecticide bait for the control of a wide variety of fly species. Equipped with excellent attractiveness against flies with the double effect of food and sexual attraction. It acts by ingestion and by contact on the insect's nervous system. The product should be distributed on surfaces usually frequented by flies.

Choose the points where flies usually pass or create particular discomfort (around windows, in bathing areas, near dunghill), possibly avoiding drafts.

The product contains denatonium benzoate, a bittering substance that prevents the accidental ingestion by animals and children

Dosage and Use

MUSCA BLU must be spread over surfaces where flies usually feed themselves and the bait renewal frequency varies from one to six weeks according to the pest level and intensity. MUSCA BLU can be used both to prevent fly emergencies and to reduce fly population. Spread the bait directly from the package or from any other suitable container. Distribute MUSCA BLU, without accumulate it, at the dose of 25 g for 10 m² of surface. Place the baits out of the reach of children and pets. In case the attractant power of the baits is sufficient (especially in case of problematic infestations), it is possible to pour water or milk on them in order to make them more luring

TARGET INSECTS: Flies.

APPLICATION FIELDS: around the windows, in the bathing areas, dungarees, zootechnical environments even in the presence of animals.

DANGER

Difenableu Block, is a ready-to-use bait in a paraffined block base on Difenacoum. The formulation contains Denatonium Benzoate a bitter substance used to prevent accidental ingestion by children. The bait is effective even after a single ingestion as well as being very palatable and not to create suspicion within the colony.

For use in tamper-proof bait boxes and covered and protected places. Protect the bait from atmospheric conditions.

Dosage and Use

Domestic mouse: 40g of product for bait station.

Rats: 60g of product for bait station (low infestation).
100g of product for bait station (high infestation).

TARGET SPECIES: domestic mouse (*Mus musculus*), Gray Rat (*Rattus norvegicus*) and Black Rat (*Rattus rattus*).

APPLICATION FIELDS: inside buildings, around buildings, in open areas.

AVAILABLE SIZES

Block: 20 g bait in box of 10 Kg.

CODE: 2-915-7-1X10

Nara® Bloc

NON-TOXIC SOLID ATTRACTANT FOR MONITORING MICE AND RATS

Available in different flavors (vanilla, meat, fish, choco, mango), it consists of a special plastic material, it does not contain any allergens and is highly attractive to rodents.

Suitable for the food industry, its attractiveness lasts at least 3 months. It may also be used in humid environments as it is resistant to mould. It has a hole for placing in standard bait dispensers.

Features

- **Dimension:** 2,6x2x2 (h) cm
- **Weight:** 5 g

TARGET SPECIES: domestic mouse (*Mus musculus*), Gray Rat (*Rattus norvegicus*) and Black Rat (*Rattus rattus*).

APPLICATION FIELDS: inside buildings, food industries, food warehouses.

AVAILABLE SIZES

Nara® Bloc Vanilla: Jar of 75 pcs.
CODE: 2-1754-NBL-75

Nara® Bloc Vanilla: Jar of 20 pcs.
CODE: 2-1754-NBL

Nara® Bloc Fish: Jar of 20 pcs.
CODE: 2-1754-NBL-P

Nara® Bloc Meat: Jar of 20 pcs.
CODE: 2-1754-NBL-C

Nara® Bloc Choco: Jar of 20 pcs.
CODE: 2-1754-NBL-CH

Nara® Bloc Mango: Jar of 20 pcs.
CODE: 2-1754-NBL-M

Nara® Lure

NON-TOXIC SOLID ATTRACTANT FOR MONITORING MICE AND RATS

Available in different flavors (vanilla, meat, fish, choco, mango), it consists of a special plastic material, it does not contain any allergens and is highly attractive to rodents. Suitable for the food industry, its attractiveness lasts at least 3 months. It may also be used in humid environments as it is resistant to mould.

With its typical “mushroom” shape, it may be placed in snap traps (“IRT big snap trap” type). Dimensions: 1.5 cm x 1.5 cm (diameter). Weight: 1 g

Features

- **Dimension:** 1,5x1,5 (Ø) cm
- **Weight:** 1 g

TARGET SPECIES: domestic mouse (*Mus musculus*), Gray Rat (*Rattus norvegicus*) and Black Rat (*Rattus rattus*).

APPLICATION FIELDS: inside buildings, outside, food industries, food warehouses.

AVAILABLE SIZES

Nara® Lure Vanilla: Jar of 100 pcs.
CODE: 2-1754-NLU

Nara® Lure Fish: Jar of 100 pcs.
CODE: 2-1754-NLU-P

Nara® Lure Meat: Jar of 100 pcs.
CODE: 2-1754-NLU-C

Nara® Lure Choco: Jar of 100 pcs.
CODE: 2-1754-NLU-CH

Nara® Lure Mango: Jar of 100 pcs.
CODE: 2-1754-NLU-M

Virtual pasta bait for monitoring mice and rats

FRESH PASTA BAIT WITHOUT ACTIVE INGREDIENT

Fresh pasta bait with a special mixture of food ingredients for human use that allows constant and continuous monitoring of murine infestations. Since it does not contain any toxic substances it can be used in food preparation areas.

Virtual rodent bait can be disposed of in the same manner as any other food product

Features

Fresh Pasta

- **Size:** 5x7 cm
- **Weight:** 12-15 g

TARGET SPECIES: domestic mouse (*Mus musculus*), Gray Rat (*Rattus norvegicus*) and Black Rat (*Rattus rattus*).

APPLICATION FIELDS: inside buildings, food industries, food warehouses.

AVAILABLE SIZES

Virtual pasta bait: Bucket of 10 Kg.
CODE: 2-188-1

Virtual bait block for monitoring mice and rats

BAIT BLOCK WITHOUT ACTIVE INGREDIENT

Block bait with a special mixture of human food ingredients that allows constant and continuous monitoring of murine infestations. Because it contains no toxic substances, it can be used in food preparation areas. Virtual rodent bait can be disposed of like any other food product.

Features

Block

- **Size:** 2,6x2,6x4,5 (h) cm
- **Weight:** 30 g

TARGET SPECIES: domestic mouse (*Mus musculus*), Gray Rat (*Rattus norvegicus*) and Black Rat (*Rattus rattus*).

APPLICATION FIELDS: inside buildings, food industries, food warehouses.

AVAILABLE SIZES

Virtual Block bait: Bucket of 5 Kg.
CODE: 2-915-EV5

EQUIPMENTS

Pg. 35 PHYSICAL CONTROL EQUIPMENT

Pg. 38 ACCESSORIES AND SMALL EQUIPMENT

Pg. 39 SPRAYING EQUIPMENT

Pg. 45 SOLVENTS - D.P.I.

Thermo Bug® 3.0 Basic **NEW**

HEAT GENERATOR

Easy to use and lightweight heat generator (only 19 kg). Update 3.0 improved performance in terms of maximum achievable temperature (up to 70 °C) and safety, with the use of additional sensors on fan operation and shutdown in case of overheating. The installed test button verifies that all the equipment works correctly before starting the treatment.

The new built-in thermostat makes the temperature detection even more accurate, with thermal detection every second and an accuracy of + / - 0.5 C, while maintaining simplicity and practicality. This allows you to set the inlet air temperature in the instrument. The compact dimensions reduce the encumbrances inside the treated premises and during the transport. You can select 2 power levels: 4,5 or 9 kW depending on the size of the area and the temperature you want to reach.

TARGET INSECTS: Bed bugs, termites (*Kaloterme e Cryptoterme*), worm, foodstuff insects.

APPLICATION FIELDS: Hotels, residences, accommodation, schools, transport.

Features

- Dimensions: L: 670 mm, P: 330 mm, H: 600 mm
- Weight: 19 kg.
- Power: 4,5 or 9 kW.
- Power supply: 380V (5 Poles) 16 A, 10 kW max absorbed.

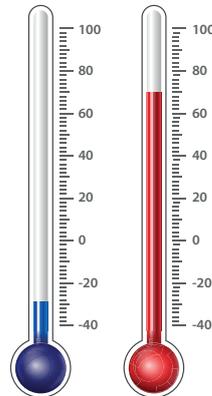

PACKAGE

Thermo Bug® 3.0 Basic: Single pcs.
CODE: 4-1858-9

Why choose the heat?

The use of physical treatments for the elimination of pests allows to exclude the now widespread phenomena of resistance to insecticides, to perform a treatment respectful of the environment and in line with what is required by the market, increasingly sensitive to the use of chemicals.

- No resistance to treatment
- Non-toxic to humans and food
- Leaves no residue (chemical)
- It requires a diffuse and green energy source: the electric current
- Allows to treat the goods / material / object and the environment in which it is located allowing the total felling of the weeds present.
- The heat eliminates all developmental stages from eggs to adults.
- Properly managed heat does not cause any damage to environments and how it is treated (where possible to use it)

Ambient temperatures
Less than -18 °C or more than 45 °C in a short time, they are able to eliminate parasites within civil and domestic environments.

Accessories for Thermo Bug®

The 16 Ampere cable allows to connect one and only one Thermo Bug® machine directly to the industrial electrical socket; the 32 Ampere cable, on the other hand, is connected to the industrial electrical socket and to the Supply Tower, on which two Thermo Bug® machines can be connected..

Features

The 16 Ampere cable is therefore useful for direct connections (socket > Thermo Bug®) while the 32 Ampere cable is suitable for socket connections > Power Tower > n° 2 Thermo Bug.

PACKAGE

Thermo Bug® 3.0 Basic - Cable 16 A: Single pcs.
CODE: 4-1858-8

Thermo Bug® 3.0 Basic - Cable 32 A: Single pcs.
CODE: 4-1858-7

Thermo Bug® 3.0 Basic - Turrets: Single pcs.
CODE: 4-1858-10

Data logger

Products are designed to meet the growing demand for cost effective electronic environmental logging solutions. Combining state of the art technology, innovative design and high volume manufacturing techniques, the LogTag® system provides the most cost effective, high performance environmental data logging system available for today's market.

Log Tag Trix-8

Data logger equipped with an external thermal sensor positioned in a recess of the instrument.

Features: delayed recording conditions, sampling interval, number of continuous or fixed readings.

PACKAGE

Log Tag Trix-8: Single pcs.
CODE: 4-1890-TRIX-8

Log Tag Trex-8

Data Logger with interchangeable external probe, which allows surveys of temperature from - 40 ° C to + 99 ° C. It is set up to record easily even in conditions of delayed recording, sampling interval, number of continuous or fixed readings.

PACKAGE

Log Tag Trex-8: Single pcs.
CODE: 4-1890-TREX-8

Log Tag Utred 30 WiFi

It is a 30 day wifi logger with display, the recommended vaccine monitoring logger. This Temperature Recorder measures and stores up to 16,000 temperature readings over a -40 ° C to +99 ° C measurement range, using a remote temperature probe. Enough for 67 days at 6 minute logging.

The display is designed to show 'at a glance' if temperature excursions have occurred during the current day and up to the previous 29 days. The display also shows the current temperature reading, the current time, recording status and battery status.

PACKAGE

Log Tag Utred 30 WiFi: Single pcs.
CODE: 4-2456-U30WIFI

Steam for Log Tag Trex-8 and Utred 30 Wifi

Stem 140 mm long, diameter 5 mm, stainless steel with tip. Without handle. The length of the extension cable is 1.5 m

PACKAGE

Steam for Log Tag Trex-8: Single pcs.
CODE: 4-1890-ST100T-15

Log Tag Haxo-8

Data logger with integrated sensor for measuring humidity and temperature.

It allows measurements from 0 to 100% RH (relative humidity) and from -40 ° C to + 85 ° C

PACKAGE

Log Tag Trex-8: Single pcs.
CODE: 4-1890-HAXO-8

Log Tag LTI

Base of the interface for connecting the Data Logger to the PC via a USB port.

Saves data to disk.

PACKAGE

Log Tag LTI: Single pcs.
CODE: 4-1890-LTI-USB

Vapor_Kill

DRY-SATURATED STEAM ELECTRIC GENERATOR

Bactericide and fungicide steam for controlling bed bugs.

Electric dry-saturated steam generator for the control of bed bugs, bactericide and fungicide. Applied in all indoor environments. Steam temperature in boiler: 155 °C
Operating pressure: 5 bar

The application of Vapor Kill avoids any risk of chemical contamination of the environment and the operator.

Thanks to the light weight and the small size, Vapor Kill can act optimally for all environments.

TARGET INSECTS: Bed Bugs

APPLICATION FIELDS: Hotel, residence, housing.

Features

- **Boiler:** in AISI 304 steel
- **Power supply:** 230 V, mains.
- **Dimensions:** 45x28x30 cm (h).
- **Weight:** 4,5 kg

Content of the package:

Machine body, bedbug grip, boiler cap, measuring funnel, cleaning rag, service and maintenance manual

PACKAGE

Vapor_Kill: Single pcs.
CODE: 4-1648-Q50003053

Vapor_Kill accessories kit: Single pcs.
CODE: 4-1648-Q50103082

Accessories for Vapor_kill **NEW**

Sanix Italy

Accessory for environmental sanitization through the use of the saturated dry steam generator Vapor_kill.

The special handle allows you to take advantage of the flow generated by Vapor_kill for the distribution of sanitizing disinfectant solutions. The jet can be set to 3 power settings for each situation. The 2-meter pipe allows easy operation. The nebulization is intense and homogeneous and allows to quickly sanitize all surfaces. The reduced size of the "drops" combined with the powerful flow allows you to reach even the most difficult corners to deal with normal spraying pumps.

TARGET: Viruses, bacteria, fungi, molds.

APPLICATION FIELDS: Hotels, residences, public places, housing.

Features

- **Tank:** 0.5 liters, specific for Vapor_kill
- **Pipe:** 2 m.

PACKAGE

Sanix Italy: Single pcs.
CODE: 4-1648-Q06105074

Multi-dose Bait Gun

HANDGUN
FOR THE APPLICATION OF GEL INSECTICIDE

Compatible with 30/35g gel cartridges.
It acts by pre-compression allowing the release of the gel in a precise and targeted;
The amount of bait dispensed can be adjusted using the dial on the back of the gun, the adjustment knob can be set to 4 different settings:

- 1 - 0.25 g supply;
- 2 - 0.35 g supply;
- 3 - 0,50 g supply;
- 4 - gel drops of 3-6 mm in diameter supply.

The ergonomic design of the handle reduces fatigue during use.

Also available the Bait Gun Holster, holster for gun Multi-dose Bait Gun made of durable material, with removable inner tube in polyethylene for easy cleaning. Equipped with an elastic band on both sides for housing additional gel cartridges and a front pocket for tips and needles. The holster easily attaches to the operator's belt using a Velcro strap at the rear.

PACKAGE

Multi-dose Bait Gun: Single pcs.
CODE: 4-1772-34014

Bait Gun Holster: Single pcs.
CODE: 4-1772-34015

Dosamatic® GR

MANUAL DISTRIBUTOR OF GRANULAR PRODUCT

Dosamatic® GR is equipped with a 10 liters tank and shoulder straps for transport, allows an adjustable dispensing of 2 to 10 g of granular product.

It can be used in all operations where it is required a precision of the dosage of granular anti-larval formulations especially for culverts, grills and mouths of wolves.

PACKAGE

Dosamatic® GR: Single pcs.
CODE: 4-1168-GR

Top / Economy Gel Gun

HANDGUN
FOR THE APPLICATION OF GEL INSECTICIDE

Compatible with 30/35g gel cartridges.
Available both with metal plunger and regulator (Top version) and with plastic plunger (Economy version).

TOP Version is indicated for the use of cartridges of the line Advion, Goliath, AMP, Viktor, Foval Gel, Blattoxur Gel.

ECONOMY Version is indicated for the use of cartridges of the line Advion Maxforce, AMP, Blattoxur Gel.

PACKAGE

Top Gel Gun: Single pcs.
CODE: 4-1-BAIT

Economy Gel Gun: Single pcs.
CODE: 4-1-BAIT-EC

Gel Gun

HANDGUN
FOR THE APPLICATION OF GEL INSECTICIDE

It acts by pre-compression, allowing the release of each drop of gel in a precise and targeted.

Equipped with a mechanism with 5 positions mounted inside the handle and a selection of different tips. (cartridges of 30 g / 35 g).

PACKAGE

Gel gun with cleaning kit: Single pcs.
CODE: 4-31-373

Needle kit for cleaning: Single pcs.
CODE: 4-31-373-KIT

RX Pump

BATTERY KNAPSACK SPRAYER WITH 12 L PLASTIC TANK

Equipped with telescopic lance and adjustable MR 1.5 mm nozzle, flexible hose and lance handle with dosing valve and 12 V motor. Equipped with a water-resistant battery charge level indicator panel and acoustic warning systems and equipped with a triple filter system (lance handle, filling hole, end of the suction tube). Reliability and appropriate operating parameters are provided by: 12 volt engine, gel battery with high capacity 7200mAh. Equipped with battery charger and 1 mm MR auxiliary nozzle and MF3.110 flat nozzle.

Features

- **Supply:** 0,4 - 2,2 l/min.
- **Empty weight:** 7 kg

The package contains: tank, connecting tube, full lance, battery, battery charger, spare nozzle set.

PACKAGE

RX: Single pcs.
CODE: 4-1851-RX

FX Pump

BATTERY KNAPSACK SPRAYER WITH 7,5 L PLASTIC TANK

From the very beginning, we wanted to create a sprayer that will be light and battery-powered. FX™ x-line is our most advanced product and we are sure that you will love it and you will discover a new dimension of work with it. It weighs only 3.5 kg and is enough for more than 3 hours of work. After that, you can easily exchange the battery and keep moving. All telescopic lances are equipped with APS dust protection to prevent the entry of contaminants inside the lance. Thanks to such a solution, they are considered to be one of the most reliable devices of this type on the market.

Features

- **Supply:** 0,4 - 2,2 l/min.
- **Empty weight:** 3,35 Kg

PACKAGE

FX: Single pcs.
CODICE: 4-1851-X7FX

VX Pump

BATTERY CART SPRAYER WITH 20 L PLASTIC TANK

Equipped with telescopic lance and adjustable MR 1.5 mm nozzle, flexible hose and lance handle with dosing valve and 12 V motor. Equipped with a water-resistant battery charge level indicator panel and acoustic warning systems and equipped with a triple filter system (lance handle, filling hole, end of the suction tube). Ergonomic base. High capacity gel battery (7200 mAh) and electronic module with microprocessor. Equipped with battery charger and 1 mm MR auxiliary nozzle and MF3.110 flat nozzle. Spare parts and additional gaskets and silicone grease included.

Features

- **Supply:** 0,4 - 2,2 l/min.
- **Empty weight:** 11,5 Kg

The package contains: tank, connecting tube, full lance, battery, battery charger, spare nozzle set..

PACKAGE

VX: Single pcs.
CODE: 4-1851-VX

V-Black Elektron

BATTERY KNAPSACK SPRAYER

The sprayer is equipped with comfortable adjustable shoulder straps to help the user during the operation. Thanks to the 12 l polypropylene tank and the rechargeable lithium battery it is easy to use and long lasting. With spraying at 2 bar, the battery charge lasts up to 9 hours, while at 0.5 bar it can last up to 15 hours. Equipped with NBR gaskets, resistant to high breaking loads and mineral oils. There are 2 nozzles supplied: made in brass for spraying and made in brass and acetal resin in a fan shape ideal for weeding.

Features

- **Empty weight:** 3,5 Kg.
- **Dimension:** 36,5x23x57,5 cm

PACKAGE

V-Black Elektron: Single pcs.
CODE: 4-1382-VBE

433 H

HIGH PRESSURE PUMP WITH PETROL ENGINE

It is equipped with a Petrol Engine Honda 4T 25 cc and 20 l tank. È dotata di lancia in acciaio inox da 60 cm e di manometro sull'impugnatura. It is equipped with a 60 cm stainless steel lance and a pressure gauge on the handle. It comes with a double flat nozzle head and stainless steel guards and a ventral belt for proper support.

Features

- **Pressure: adjustable:** 1-30 bar
- **Empty weight:** 8,3 kg
- **Rate:** 1.2 l to 10 bar; 1.7 l to 20 bar; 2.4 l to 30 bar.

Accessories available on request: 3 terminal nozzle, 120 cm lance extension, 3-nozzle lance, 120 cm spray lance with interchangeable nozzles, 120 cm - 230 cm telescopic lance, 100 cm weeding bar with 4 nozzles and 10 m extension with support.

PACKAGE

433H: Single pcs.
CODE: 4-2101-433H

Master 452

BACKPACK ATOMIZER WITH 12 L TANK

New generation atomizer with aluminum body to reduce weight and ensure strength and durability. The developed engine reduces consumption and emissions while maintaining a high standard of constant power.

Features

- **Engine:** 2 stroke engine/ 66,5 cm³ / 2,1 kw (2,9 hp)
- **Range:** 11 m horizontal
- **Tank capacity:** 1,4 l
- **Empty weight:** 9,6 Kg.

Accessories available on request: ULV nozzle, double nozzle, 60 cm blowing hose extension, auxiliary pump kit to maximize performance at every angle.

PACKAGE

Master 452: Single pcs.
CODE: 4-2101-MASTER452

Master 452 ULV nozzle: Single pcs.
CODE: 11-2101-4900479

Dyna-Jet L-30

AUTOTRANSPORT BATTERY NEBULIZER

Electric powered ULV generator. Digitally controlled high speed rotary atomizer produces the industry's most consistently sized spray droplets not achievable by conventional nozzles. It features a unique remote controlled tilting head that allows for multi positioning of the spray. The lightweight, aluminum and stainless steel construction provides years of low maintenance and trouble free use. Because the Dyna- Jet® operates entirely on electric power, the unit is not susceptible to weight issues and maintenance expenses normally associated with gasoline powered equipment.

Remote-control features: Tilt angle adjustment, machine on/off, spray on/off, formulation/flush selector, battery/hour meter (Backlit for night operation).

Features

- **Brought:** from 14 ml / min. to 414 ml / min.
- **Washing tank:** 3,8 liter
- **Dimension:** 112 x 74 x 99 cm (L x W x H)
- **Empty weight:** 47,6 kg, with the battery 66,5 Kg.

Maxi-Pro 4 ULV

ENGINE ULV MICRONIZER FOR VEHICLE

Equipped with 4 nozzles driven by a powerful volumetric coaxial compressor with an 18 Hp twin-cylinder engine, it allows with particular dosages and pressure adjustments to dispense 90% of the formulation with particles below 20µ. It is equipped with a 57 liter shockproof polyethylene tank resistant to corrosion and UV rays, electric start.

Features

- **Delivery:** from 9 to 600 ml/min
- **Output air volume:** up to 11.2 cubic meters per minute
- **Dimension:** 112x94x76 (h) cm
- **Empty weight:** max 185 Kg.

PACKAGE

Maxi-Pro 4 ULV: Single pcs.
CODE: 4-30-204

Cyclone Ultra

ULV ELECTRIC MICRONIZER

Equipped with a two-stage fan and sturdy metering valve, it ensures the delivery of particles smaller than 20 microns, regardless of the flow rate and viscosity of the sprayed liquid.

Features

- **Tank:** from 3,8 liters
- **Range:** up to 20 m
- **Empty weight:** 4,3 Kg.

PACKAGE

Cyclone Ultra: Single pcs.
CODE: 4-30-102

Article without plug

Cyclone Flex Hose Ultra

ELECTRIC MICRONIZER WITH FLEX HOSE

Equipped with a two-stage fan and sturdy metering valve, it ensures the delivery of particles smaller than 20 microns, regardless of the flow rate and viscosity of the sprayed liquid. Equipped with a 50 cm flexible hose to treat pipes, false ceilings or other places that are difficult to access or that require sealed applications.

Features

- **Tank:** da 3,8 liters
- **Empty weight:** 5 Kg.

PACKAGE

Cyclone Flex Hose Ultra: Single pcs.

Hurricane ES

PORTABLE ELECTRIC NEBULIZER OF ELECTROSTATIC TYPE

High quality corded electrostatic fogger, fast and effective way to sanitise and decontaminate high touch surfaces and at risk areas. This technology allows for consistent coverage, better surface contact and optimum economy. Perfect for high touch surfaces, the Hurricane ES allows for quicker application time, more economy and less downtime, so you can get back to business with confidence.

Article without plug

Features

- **Tank:** 3,8 liters
- **Range:** up to 15 m
- **Empty weight:** 3,4 Kg.

PACKAGE

Hurricane ES: Single pcs.

Hurricane CL

CORDLESS FOGGER

Battery-powered, cordless, powerful multi-purpose fogger for sanitising, cleaning and pest control applications. Suitable for use with Solvent, Oil and Water based solutions.

Cordless, Fast and Effective Fogging. The new Hurricane CL gives you freedom of movement without compromising on power and performance. Powered by a 36V lithium-ion battery pack, it has a run time of up to 105 minutes. Perfect for technical applications. Three precision nozzles for greater output capacity, translucent corrosion and impact resistant tank, stainless steel precision metering valve with filter, adjustable locking device for angle settings, On/Off switch with light, cushioned carry handle, CE certified, battery-powered, cordless.

Features

- **Tank:** 3,8 litre
- **Flow Rate:** 0-120ml per minute
- **Battery life:** 105 minutes

PACKAGE

Hurricane CL: Single pcs.
CODE: 4-30-101-CL

Battery DC20 Plus ULV **NEW**

ULV BATTERY NEBULIZER

Designed for spraying liquid products, it allows you to achieve up to 40 minutes of continuous dispensing with only 3 hours of charging. Equipped with a 2-litre tank, 170 W power and adjustable nozzle that produces drops between 5 and 50 microns in size.

Features

- **Tank:** 2 liters
- **Range:** 2-5 m
- **Empty weight:** 3,1 kg

PACKAGE

Battery DC20 Plus ULV: Single pcs.
CODE: 4-2823-DC20PLUS

Moo Gun H

BATTERY NEBULIZER

Ultra Low Volume particle sprayer for use with disinfectants, cleaning products etc. used in healthcare, aged care, childcare and all commercial buildings, rechargeable Battery, extended working time by using lithium-ion battery, liters chemical tank, light P.P Body case, ULV spray.

The pack contains:

Complete nebulizer
2 batteries.

Features

- **Tank:** 5 liters
- **Range:** 3-6 m
- **Empty weight:** 3,4 Kg.

PACKAGE

Moo Gun H: Single pcs.
CODE: 4-1286-BATT

Bure 3

ULV NEBULIZER

Electric ULV nebulizer that generates cold fog (10 to 20 microns) compact and easy to use. The tank is removable from the body of the machine. The safety cap of the tank excludes the leakage of the solution. The powerful engine (1.25 KW) generates a stream of air that carries the micronized droplets in suspension. The flow regulator of the solution used, placed above the tank, allows you to better manage the spray flow according to the treatment needs. At the base of the instrument you can wind the cable supplied with the length of 2 meters.

Features

- **Tank:** 3 liters
- **Range:** 6-10 m
- **Empty weight:** 2,9 kg

PACKAGE

Bure: Single pcs.
CODE: 4-360-BURE

An Gae Fog 4.5

ULV NEBULIZER

ULV nebulizer (5 to 20 microns) compact and easy to use. The powerful engine generates a stream of air that carries micronized droplets in suspension. By rotating the front nozzle it is possible to adjust the flow rate and the size of the drops emitted. The base allows a stable position thanks to the low center of gravity.

Available in two different colours.

Features

- **Tank:** 4,5 liters
- **Range:** 5-10 m
- **Empty weight:** 2,0 Kg.

PACKAGE

An-Gae Fog 4.5: Single pcs.
CODE: 4-1286-ULV

Tornado 220 V Serie 2

ELECTRICAL MICRONIZER

Ideal for moistening treatments in greenhouses and nurseries, for disinfection and for the supply of disinfectants and germicides. Production of droplets from 10 to 40 microns. Equipped with a removable tank for the product, filter and precision dispense valve that allows you to adjust the consumption up to 26 l/h.

Features

- **Removable Tank:** 11,5 liters
- **Range:** up to 25 m
- **Weight:** 6,6 Kg.

PACKAGE

Tornado 220 V 2 Series: Single pcs.
CODE: 4-30-113

Mini Mist Fogger KB 100

SMALL PORTABLE THERMAL FOGGER

It is equipped with two different tanks, one for the insecticide and the other for the carrier. It is possible to dispense a mixed combination of smoke-mist. Operated via liquid propane gas or liquid butane from a separate canister (not included in the original package) generally available in hardware stores or camping shops.

Features

- **Dimension:** 61x17,5x40 cm
- **Tank:** up to 400 ml
- **Weight:** Empty: 1,7 Kg. - Full: 2,5 Kg.

Features of the feeding canister:

- MSF-1 CRV Type Smart Series; complies with EN 417
- Propellant: pressurised Propane/Butane
- Contents: 390 ml - 227 g
- Delivery: 1 h - 30 min
- Smart Series standard camping type coupling

PACKAGE

Mini Mist Fogger KB 100: Single pcs.
CODE: 4-360-10

Solvente G

GLYCOLIC-BASED SOLVENT USED AS A DILUENT OF CONCENTRATED LIQUID INSECTICIDES OR DISINFECTANTS

Glycolic-based solvent for the dilution of concentrated liquid insecticides or environmental disinfectants SOLVENT G is characterized by higher viscosity, high foggy power and high compatibility for seals and rubber parts of equipment. SOLVENT G is washable with water. Suitable for use with aerosolizers, nebulizers, ultra low volume ULV (Ultra Low Volume), When used with formulated insecticides a mist is obtained consisting of particles of aerosol of optimal size for the abatement of flying insects. It is compatible with disinfectants and virucids based on quaternary ammonium salts and alcohols.

AVAILABLE SIZES

Tank: 10 L
CODE: 1-30-1-11

Solvente OBV

SOLVENT BASED ISOPARAFFINIC USED AS A DILUENT OF CONCENTRATED LIQUID INSECTICIDES

GLOVES

GLASSES

MASK

SUIT

DANGER

To be used with nebulizers, ULV and Thermal Foggers.

AVAILABLE SIZES

Tank: 10 L
CODE: 1-30-2-10

Solvente L

GLYCOL-BASED SOLVENT USED AS A DILUENT FOR CONCENTRATED LIQUID INSECTICIDES OR DISINFECTANTS

It is used in applications with aerosolizers, nebulizers, ULV (Ultra Low Volume) and fumigation with thermal foggers. During use with insecticide formulations, a cold or hot mist is formed, consisting of particles of optimal size for the killing of flying insects, present in the environment at the time of treatment.

AVAILABLE SIZES

Tank: 10 L
CODE: 1-30-1-10

Solvente MTE

SOLVENT OF PLANT ORIGIN TO CARRY OUT THE DILUTION OF LIQUID CONCENTRATED INSECTICIDES

It is possible to dilute both solvent-based emulsifiable concentrates and products formulated for ULV. It is used with cold mist nebulizers, aerosolizers and ULV (Ultra Low Volume) and hot mists (thermal foggers).

AVAILABLE SIZES

Tank: 10 L
CODE: 1-30-2-10MTE

BG Sentinel™ 2

ASPIRATION TRAP FOR MONITORING AND CATCHING MOSQUITOES

Aspiration trap for monitoring and capturing the following species of mosquitoes: *Aedes albopictus* (Asian tiger mosquito), *Aedes aegypti*, *Aedes polynesiensis*, *Culex pipiens*, *Culex quinquefasciatus*, *Anopheles* spp., etc. BG-Sentinel™ is normally used in combination with an artificial non-polluting attractant (BG-lure) which simulates human sweat (a combination of lactic acid, ammonia and other organic substances). The attractant is placed inside the trap, in the specific slot. It is possible to add CO₂ to increase the degree of capture. Power supply 12 V DC, with a transformer or by using a car or motorcycle battery. Duration of the BG-Lure attractant: 5 months.

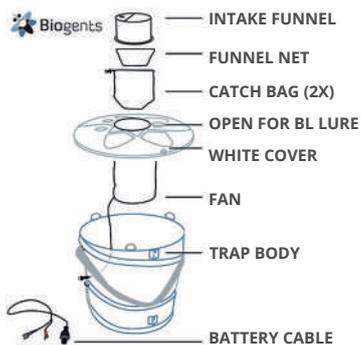

TARGET INSECTS: *Aedes albopictus* (Tiger Mosquito), *Aedes aegypti*, *Aedes polynesiensis*, *Culex pipiens*, *Culex quinquefasciatus*, *Anopheles* spp.

Features

- **Dimension:** 35 cm (diameter) x 40 cm (h)
- **Weight:** 1.4 kg
- Ability to add CO₂ to increase the degree of capture.
- Spare parts available on request.

Package Contents

Available as accessory the BG Rain Shield cover. 12volt battery not included in the package.

PACKAGE

BG Sentinel™ 2 with lure: Single pcs.
CODE: 6-1-BG-SENTINEL2

BG Sentinel™ 2 Lure: Single pcs.
CODE: 6-1-BG-LURE-2

BG Sentinel™ 2 CO₂ Kit: Single pcs., predisposition - no tank
CODE: 6-1-BG-CO2

BG Rain Shield: Single pcs.
CODE: 11-BG-10826

BG Counter

ELECTRONIC MONITORING SYSTEM TO BE APPLIED TO BG SENTINEL 2

It allows the automatic counting of the catches of flying insects and through infrared technology, it characterizes the catches based on the size of the captured insect (with three dimensional intervals) and the type of insect input. In this way the system allows to distinguish: mosquitoes, sandflies or other flying insects. The device is combined with the BG-Sentinel 2, a trap widely used by professionals for the monitoring and surveillance of mosquitoes. The BG-Counter automatically differentiates mosquitoes from other insects entering the trap, counts them, and wirelessly transmits the results to a cloud server. Thanks to a web application you can manage your mosquito traps and get new insights into daily activity patterns, adult density indices, population dynamics and effectiveness of your control activities. The BG-Counter reports mosquito counts remotely from everywhere in the world to an internet web page, samples local environmental data such as temperature, relative humidity, lets you manage the trap and the application of attractants remotely, and reduces costs associated with manually checking mosquito traps.

Features

- **Dimension:** 23x23x14 cm.
- **Weight:** 730 g.

PACKAGE

BG Counter: Single pcs.
CODE: 6-1-BG-COUNTER

BG Trap Station: Single pcs.
CODE: 6-1-BG-TRAPST

Monthly rent: Single pcs.
CODE: 6-1-BG-COUNTER-WS

BG-Gat

TRAP FOR MONITORING AND CATCHING MOSQUITOES AND OTHER HEADING INSECTS

BG-GAT (Gravid Aedes Trap) attracts female Aedes (Stegomyia) mosquitoes with water and oviposition cues. Mosquitoes trying to find an oviposition site enter the transparent chamber through the black funnel on top of the trap. In the transparent chamber they are exposed to a sticky surface, oil, or insecticides. The transparent chamber makes it difficult for the mosquitoes to escape, and the black mesh net provides a barrier between mosquitoes and the infused water. Dead mosquitoes can be collected.

 **TARGET:** Tiger Mosquito (*Aedes albopictus*).

Dimension: 27x38 cm
Weight: 1,5 kg.

The BG-Gat kit includes:

1 collection bag, 1 funnel, 1 transparent "chamber", 1 outer container, 1 ring seal.

Can be purchased separately as an accessory the double-sided glue board to be placed inside the trap.

PACKAGE

BG-Gat with glue board: box of 12 BG-GAT+60 glue boards.
CODE: 6-1-BG-GATX12

Glue Board: box of 10 pcs
CODE: 6-1-BG-GAT X12

Ovi-Catch™ Ago Mosquito Trap

PASSIVE TRAP FOR CATCHING MOSQUITOES

Trap for catching mosquitoes looking for an egg-laying site. Water in the container attracts mosquitoes to the inside of the capture cylinder. The fine mesh net prevents mosquitoes from reaching the water by remaining captured by the glue plate placed along the inside perimeter of the cylinder. It is recommended that the trap be placed in shaded areas, not near other hypothetical oviposition sites that would compete with the trap.

The adhesive base is highly viscous and resistant to external agents, the flexible plastic composition allows it to adhere uniformly to the walls of the capture cylinder to optimize the capture surface.

 **TARGET:** Tiger Mosquito (*Aedes albopictus*).

Dimension: trappola: 30 (Ø) x 40 (h) cm (inlet diameter: 17 cm)
Dimension glue base: 16x51,5 cm.

PACKAGE

Ovi-Catch™ Ago Mosquito Trap: box of 2 pcs. + 2 adhesive bases
CODE: 6-2086-OVI-1

Ovi-Catch™ Ago Mosquito Trap Glue Base: box of 48 pcs.
CODE: 6-2086-32AGO

Ovi trap

OVI TRAP FOR MONITORING *Aedes albopictus*

Monitoring is done by analyzing the number of eggs laid. The trap consists of a black container of about 400 ml volume. To the container must be associated a masonite stick, perforated and, if necessary, a stick-holder. For a correct use place the trap in a habitat favourable to the tiger mosquito (*Aedes albopictus*); place the masonite stick inside the trap containing about 3 cm of water. Masonite splint replacement schedule: weekly/biweekly.

 **TARGET:** Tiger Mosquito (*Aedes albopictus*).

Masonite stick Dimension: 3 (L) x 0,3 (thickness) x 15 (h) cm

PACKAGE

Ovi trap: Single pcs.
CODE: 6-13-19OV

Stick stop: pack in box of 100 pcs.
CODE: 29-13-19-F

Masonite Stick: box of 100 pcs.
CODE: 29-13-19-A

Red Top®

DISPOSABLE ECO-FRIENDLY TRAP FOR CATCHING FLIES

Red Top consists of a heavy-duty nylon bag with a maximum capacity of 3 liters to be filled 2/3 with water and a plastic lid with a raised cap in the middle (trap entrance); the trap is secured by a string attached to the lid. Each trap comes with instructions for use and a sachet of dehydrated protein meal food bait effective for up to six weeks. Field trials have demonstrated its effectiveness and how the trap has come to capture up to 12,000 flies in one week.

 **TARGET:** Flies and Dipters

 **APPLICATION FIELDS:** Livestock sector, barns, organic material containment sites, fly-infested environments.

Dimension: 19,5 (Ø) x 26,5 (h) cm

PACKAGE

Red Top®: box of 50 pcs complete with lure
CODE: 6-49-512X50

Red Top® lure: box of 10 pcs.
CODE: 6-49-513X10

Green funnel trap

TRAP FOR MONITORING AND CAPTURING OF MEDIUM AND LARGE SIZED LEPIDOPTERA

Funnel trap made of semi-transparent green polypropylene for monitoring and capturing Lepidoptera of forest and agricultural interest and various species of Noctule. To be activated with specific pheromone.

 **TARGET:** *Thaumetopoea pityocampa* (pine processionary moth), *Cossus cossus* e *Zeuzera pyrina* (red and yellow rhodolite)

Dimension: 24x32 (h) cm

Pheromones not included in the package.

PACKAGE

Green funnel trap: single package
CODE: 19-14-519-V

Red Top® Large

ECOLOGICAL TRAP OF REUSABLE LARGE SIZE FOR CATCHING FLIES

Red Top Large is the version dedicated to large captures, consisting of a resistant nylon bag with a maximum capacity of 8 liters to be filled 2/3 with water. Each trap comes with instructions for use and a sachet of dehydrated protein meal food bait effective for up to six weeks. Field trials have shown catches of up to 25,000 flies in one week.

 **TARGET:** Flies and Dipters

 **APPLICATION FIELDS:** Livestock sector, barns, organic material containment sites, fly-infested environments.

Dimension: 25 (Ø) x 30 (h) cm

PACKAGE

Red Top® Large: box of 25 pcs.
CODE: 6-49-512-GIGANTE

Red Top® Large bag + lure Kit: box of 25 kits
CODICE: 6-49-513-KIT

Red Top® Large lure: box of 25 pcs.
CODE: 6-49-513X25

Red Top® lure: box of 10 pcs.
CODE: 6-49-513X10

Pine Processionary Collar

COLLAR FOR THE CAPTURE OF THE PINE PROCESSIONARY LARVAE

Place on the trunk of pine and cedar trees, intercepting the larvae as they descend from the trees. Pine Processionary (*Thaumetopoea pityocampa*) larvae feed on pine needles causing much damage such as defoliation of the pine and weakening of the tree. The larvae also are extremely stinging. Leave the trap for 3 weeks after the last descents so that the pupae are formed and there is no more danger of infection.

The kit includes: 2 foam seals with adhesive side (length 70 cm), 1 polycarbonate collar, 1 plastic strap (length 250 cm), 1 self-locking buckle, 1 container bag, 1 drop tube, 3 plastic ties.

 **TARGET:** Processionary moth larvae (*Thaumetopoea pityocampa*)

Protected diameter: 45 cm (circumference 140 cm)

Accessories: 70 cm extension cable

PACKAGE

Pine Processionary collar: single package 1 kit
CODE: 19-1243-D143

Pine Processionary collar extension: single package
CODE: 19-1243-D142

Pine Processionary collar replacement bags: single package
CODE: 19-1243-D144

Vespa Trap

TRAP FOR MONITORING AND CAPTURING OF WASPS AND HORNETS

The base is equipped with a funnel entrance to allow the entry of weeds. Position the trap at a height of 1.5 m from the ground, in order to be easily inspected, away from the sun (eg under trees) and in full current air. Place a trap every 50 m². It can be used in terraces, canopies, orchards, gardens, fruit and vegetable outlets, food processing or storage industries. The action of priming against wasps occurs following insertion into the trap of the specific priming liquid. The trap is supplied with a metal hook and 1 metal wire for correct positioning. The trap is made of polyethylene. It is composed of: 1 body trap (base+cover) with funnel-shaped entrance for insects, 1 metal hook, 1 metal thread for the trap positioning, transparent cover to easy the visual control.

TARGET: Wasps, Hornets

APPLICATION FIELDS: Livestock, terraces, canopies, orchards, gardens, fruit and vegetable outlets, food processing or storage industries.

Dimension: 18 (Ø) x 14 (h) cm.

PACKAGE

Vespa Trap: box of 10 pcs
CODE: 19-14-P-04025

Vespokil

FOOD BASED LIQUID TO BE USED FOR THE MONITORING OF WASPS

Composition

Composition: water, sugar, ethyl alcohol, apple vinegar, sodium glutamate, flavours, E122 dye. Must be applied to control regularly the pests' presence in a specific place for a defined time. The above mentioned article must be used inside a trap for wasps. We suggest its use inside Vespa trap Dilute 250 ml of product with 250 ml of water.

TARGET: Wasps, Hornets

AVAILABLE SIZES

Vespokil: 500 ml bottle in box of 6 pcs.
CODE: 19-14-4-6X500

Jacket Jar™

TRAP FOR MONITORING AND CAPTURING OF WASPS AND HORNETS

The trap is reusable, made of plastic, cylindrical in shape and equipped with a yellow cover with screw closure and is intended for use outdoors. Place the trap at a height of 1.5 m from the ground, so that it can be easily inspected, away from the sun (e.g. under trees) in the presence of wasps or hornets. The baiting action against wasps and hornets occurs following the insertion inside the trap of water and specific non-toxic baiting agent. The trap is supplied with a hook for positioning.

TARGET: Wasps, Hornets

APPLICATION FIELDS: Farms, terraces, canopies, gardens, camping.

PACKAGE

Jacket Jar™: box of 6 pcs.
CODE: 19-2086-976-J

Jacket Jar™ lure replacement: box of 12 pcs.
CODE: 19-2086-976-ATT

Black stripe

FUNNEL-SHAPED TRAP FOR MONITORING AND CAPTURING STORED FOOD MOTHS

The body of the trap is colored white with longitudinal black streaks, the inner cone colored yellow, and the removable cap colored green. It is activated with the pheromone "Ephestia/Plodia" for *Plodia interpunctella* and *Ephestia* spp. It is also suitable for monitoring and capturing other flying insects using a specific pheromone (e.g. Red Palm weevil, Rhododendoptera, etc.).

TARGET: Foodstuffs Lepidoptera.

APPLICATION FIELDS: Warehouses where food is generally stored.

Dimension: 11,5 (Ø lower) x 19 (Ø the "hat") x 23 (h) cm.

The kit includes: 1 trap with 4 pheromones, to be placed at the top, in the center of the "hat". Also available in the version without pheromones.

PACKAGE

Black stripe kit: Kits consisting of 1 trap + 4 pheromones.
CODE: 19-89-100

Black stripe: single piece
CODE: 19-89-100-singola

Easy Trap

TRAP FOR MONITORING AND CATCHING SMALL LEPIDOPTERA

It is made of cardboard stretched plasticized on both sides. To be activated with specific pheromone not included in the package.

TARGET:
Lepidoptera

APPLICATION FIELDS: Food industries, mills, warehouses, supermarkets or other realities in which flour, cereals, etc. are produced or stored.

Dimension: 15,5x10x16 (h) cm

PACKAGE

Easy trap: box of 5 pcs.
CODE: 19-14-1-1X5

Toto Trap

GLUE TRAP WITH FOUR OPENINGS MADE OF ALVEOLAR POLYPROPYLENE, NEUTRAL COLOUR, FOR MONITORING AND CAPTURING FOOD MOTHS

Glue trap with 4 openings in neutral-colored alveolar polypropylene, to be activated with a specific pheromone, is complete with 3 adhesive bases.

TARGET:
Lepidopteri

APPLICATION FIELDS: Food industries, mills, warehouses, supermarkets, warehouses of flour, grain etc.

Dimension: 24x24x11 (h) cm
Glued surface: 350 cm²

Pheromones not included in the package.

PACKAGE

Toto Trap: Box of 5 traps + 15 glue bottoms
CODE: 19-72-2-1X5

Delta Trap

DELTA SHAPED GLUE TRAP FOR MONITORING AND CAPTURING SMALL LEPIDOPTERA

Made of laminated polypropylene to be activated with specific pheromone. The cardboard glue bottom is interchangeable and the pheromone must be positioned in the center (glue bottom not included).

TARGET: Lepidoptera

APPLICATION FIELDS: Food industries, mills, warehouses, supermarkets, warehouses of flour, grain etc.

Dimension: 21,5x13 x11,5 (h) cm
Adhesive surface: 200 cm²

PACKAGE

Delta Trap: box of 10 pcs.
CODE: 19-72-520

Delta Trap glue base: box of 3 pcs.
CODE: 19-14-517

Lula Trap kit

FUNNEL TRAP FOR MONITORING AND CATCHING FOOD LEPIDOPTERA

Brown polypropylene funnel trap for the monitoring and capture of Lepidoptera of foodstuffs and of forest and agricultural interest, to be activated with specific pheromone.

Equipped with transparent polyethylene collection bags, on which to note the data on the catches.

TARGET:
Lepidoptera

APPLICATION FIELDS: Indoor and outdoor environments.

Dimension: (excluding bag): 17,5x16 cm
Bag: 15x30 cm

The kit includes: 5 traps, 15 bags, 15 wires.

PACKAGE

Lula Trap kit: box of 1 kit
CODE: 19-72-1-1X5

Black Stripe Delta

TRAP FOR MONITORING AND CAPTURING FOOD LEPIDOPTERA

Trap designed for the capture of lepidoptera of foodstuffs in folded cardboard with triangular section colored white with longitudinal black streaks that, thanks to their arrangement, increase the ability to attract insects to the capture location.

TARGET: *Plodia interpunctella*, *Ephestia spp.*

APPLICATION FIELDS: Food industries, mills, warehouses, supermarkets, warehouses of flour, grain etc.

Dimension: 14x11x18 (h) cm

PACKAGE

Black Stripe Delta: 1 flowpack with 10 pcs.
CODE: 19-1772-10070

Trap for Anobids

GLUE TRAP FOR MONITORING AND CAPTURING ANOBID BEETLES

Monitoring trap to detect the presence of Anobids.

It consists of an adhesive card stretched and laminated on one side and is to be activated with specific pheromone not included in the package..

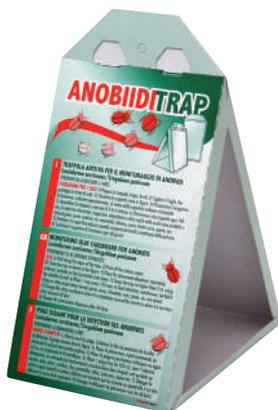

TARGET:

Tobacco Anobium *Lasioderma serricornae*, bread anobium *Stegobium paniceum*.

APPLICATION FIELDS:

Food companies, warehouses, herbalists, and other places where flour, spices, tobacco are produced or stored.

Dimension: 14x11x18 (h) cm

PACKAGE

Trap for Anobids: box of 10 pcs.
CODE: 19-14-516

3 Way trap / 3 Way Phero Pack

MONITORING DEVICE FOR CRAWLING INSECTS ACTIVATED WITH SPECIFIC ATTRACTIVE

Adhesive traps to detect the presence of various crawling insects.

3 Way Phero Pack is already activated with multi-species pheromone and food base included in the package.

3 Way Trap is to be activated with specific pheromone and food base to be purchased separately. Can be used in food companies, mills, warehouses and other areas where flour is stored. Position one trap every 10 square meters.

TARGET: Cockroaches, Silverfish, *Tribolium spp*, *Sitophilus spp*, *Stegobium paniceum*, *Oryzaephilus spp*, *Lasioderma serricornae*, *Trogoderma spp*.

Dimension: 10x10x14,1 (long side) x 2 (h) cm
Base + lid dimensions: 19x19x23,5 (long side) x 2,2 (h) cm

PACKAGE

3 Way Trap: box of 28 pcs
CODE: 19-14-P-04031

3 Way Trap + blue lid: box of 10 pcs
CODE: 19-14-P-04031BW

3 Way Phero Pack: box of 10 with 2 pcs. each
CODE: 19-14-P-04031PP

Pitfall Trap

TRAP FOR MONITORING CEREAL INSECTS

Made of polypropylene and polycarbonate specifically for *Sitophilus spp*. The trap consists of two parts to be assembled and a marker. It can be used either at the grain surface or buried up to 50 cm deep below the surface. Insects enter the trap through holes in the lid. The domed lid is specially designed so that insects cannot walk on the surface without falling into one of the trap holes; once they fall to the bottom, insects are unable to climb their way out. Pheromone (sold separately) can be used in conjunction with this trap to increase its effectiveness.

TARGET: grain weevil

Assembled trap dimensions: 9,5 (Ø) cm x 12,5 mm (h)
Weight trap: 57 g

The kit includes: 10 traps, 10 marker tags, 10 lanyards.

PACKAGE

Pitfall Trap: box of 10 pcs.
CODE: 19-89-10106

Novared

TRAP FOR MONITORING AND CAPTURING THE RED PALM WEEVIL *RHYNCHOPHORUS FERRUGINEUS*

The red or black polypropylene honeycomb trap is to be activated with a specific pheromone possibly combined with a phage attractant. Made of two foldable pieces, once assembled it takes the shape of a truncated pyramid. In the upper part of the trap there are four slits and two triangular openings that allow the entry of insects.

A double system of fins facilitates their fall and prevents their escape. On the external walls a net sheath is applied which allows the insects to climb up to the openings in case they do not reach the trap in flight but from the ground. The trap can be placed on the ground or hung on the trunk of the palm tree. It is advisable to place the traps several meters away from the palms to avoid that the attracted weevils can attack the plant before being caught.

TARGET: Red palm weevil.

Dimension: 22x22x30 cm

Pheromones not included in the package.

PACKAGE

Novared: Single pcs.
CODE: 19-72-2

HalyStop

TRAP FOR THE MASSIVE CATCHING OF THE ASIAN BUG

If the Asian bug *Halyomorpha halys* is a real scourge for agriculture, also for the world of pest control this insect causes inconvenience.

HalyStop represents an effective capture system, complete with aggregation pheromone for *Halyomorpha halys*. The duration of the pheromone is about 12 weeks, and must be installed at the end of July, when the Asian bug is still active. The location should be about 1.5 - 2 meters above the ground and in a horizontal position, near trees or shrubs, and at a distance of about 20-30 meters from each other and within 10 meters from a building;

Traps should be well exposed and not covered by vegetation to facilitate the spread of the pheromone and facilitate trapping.

TARGET: Asian Bug (*Halyomorpha halys*)

PACKAGE

HalyStop: box of 2 adhesive panels + 1 pheromone
CODE: 19-2590-HALYSTOP

Fly String

ADHESIVE TAPE FOR FLY CATCHING

Permanent trap for flies and other flying insects used in cases of heavy infestations. Made without toxic substances, it can reach high capture concentrations estimated up to 500 flies per linear meter. The device equipped with an installation kit must be installed at ceiling height, where it can remain fixed even for long periods. Once all the adhesive tape has been used, it will be replaced with the spare part, leaving the positioning of the installation kit unchanged.

TARGET: Flies and other Diptera.

APPLICATION FIELDS: Livestock, barns, stables, ranches and other farm buildings.

The kit includes: bracket, pulleys, screws, empty reel, 700 m long reel of adhesive tape. Also available is the 150 m reel of adhesive tape that does not require a fastening kit.

PACKAGE

Fly string complete kit: Single pcs.
CODE: 6-53-5-FLYSTRING

Fly string recharge coil 150 m: Single pcs.
CODE: 6-53-5-BOBINA150

Fly string recharge coil 700 m: Single pcs.
CODE: 6-53-5-BOBINA

Fly Roller XL

ADHESIVE TRAP IN ROLL FOR THE MONITORING OF FLIES AND OTHER FLYING INSECTS

Eco-friendly adhesive roll specially designed to attract and capture flies. Its 3D design and fluorescent colors increase the effectiveness in attracting insects, even in case of heavy infestation of flies. Equipped with metal support for anchoring the trap.

TARGET: Flies and other Diptera.

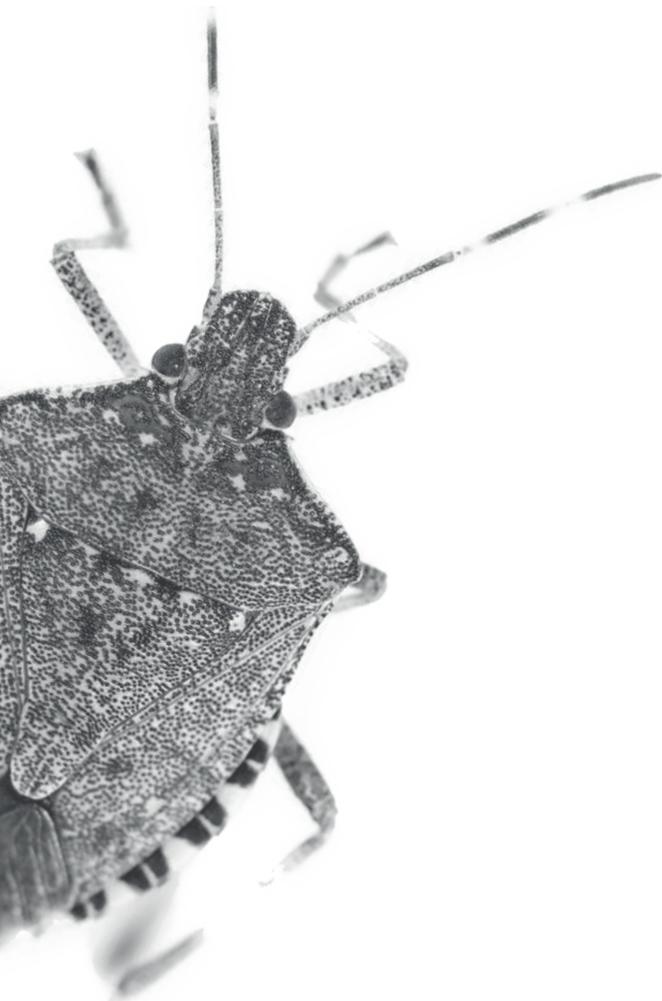

APPLICATION FIELDS: Zootechnics, livestock stables, milking parlors.

Dimension: 9 m x 30 cm.

PACKAGE

Fly Roller XL: Single pcs.
CODE: 6-1300-ROLLER-XL

GLOstik™ Flying Insect Trap

LED LIGHT GLUE TRAP

Flying insect trap features a disposable glue tube, using a battery powered LED light. Reflective cap intensifies insect attraction. The LED bulb lasts up to 10,000 hours. The trap performs its function at night, during which it must be turned on to trap flying insects that have entered during the day.

TARGET: Mosquitoes, flies and other flying insects.

APPLICATION FIELDS: Areas with low light, indoors: inside closets, under or over counters, pantries, attics. outdoors: garages, yards, porches, always away from water.

PACKAGE

GLOstik™ Flying Insect Trap: box of 1 base + 2 tubes of disposable glue in master carton of 6 packs, Batteries not included.
CODE: 6-2086-908

GLOstik™ Refill Pack: box of 2 in master carton of 6 packs
CODE: 6-2086-922

Gold Stick™ Fly Trap

ADHESIVE STICK FOR CATCHING FLIES AND OTHER FLYING INSECTS

The golden yellow color and the granular food bait contained in the package make this glue trap highly attractive to flies and other flying insects. The trap is disposable with a hook for hanging and offers a capture surface of 243 cm². The trap is primarily designed for professional outdoor applications but is also safe to use in sensitive indoor environments as it contains no toxins, insecticides, hazardous chemicals or vapors. It is also effective in high and low temperatures.

TARGET: Flies and other flying insects

APPLICATION FIELDS: Livestock, stables, barns, homes, garages, offices, kitchens, laboratories, anywhere where there is a heavy infestation of flies or other flying insects.

Dimension: 3 (diameter) x 61 (h) cm

PACKAGE

Gold Stick™ Fly Trap: box of 24 pcs
CODE: 6-83-601-GOLD-G

Willy Trap

CHROMOTROPIC GLUE TRAP

Made of yellow or white honeycomb polypropylene, to be activated with a specific pheromone or specific priming agent

TARGET: Diptera Tephridites, Hymenoptera Tentrenidae

APPLICATION FIELDS: Livestock

Dimension: 28x21 cm
Adhesive surface: 350 cm²

Pheromones not included

PACKAGE

Willy Trap: box of 3 pcs.
CODE: 19-72-3-1X3

Yellow chromotropic panel

ADHESIVE PANEL FOR CATCHING FLYING INSECTS

Adhesive panel available in siliconized cardboard or honeycomb plastic. It is useful for monitoring and capturing flying insects. Place the panel inside the special U.V. lamps or on the wall, hanging it as it is.

TARGET: Flies, Gnats, Wasps, Bugs, Noctuids, Moths, Anobids, etc.

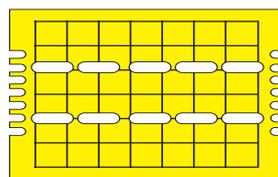

APPLICATION FIELDS: Livestock

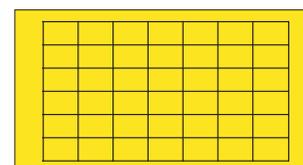

Plastic panel dimensions: 59,5x36,5 cm (with holes for hanging)

Cardboard panel dimensions: 54,4x31 cm

Plastic panel

Cardboard panel

PACKAGE

Plastic panel: box of 6 pcs.
CODE: 6-16-965

Cardboard panel: box of 6 pcs.
CODE: 6-16-963

Trap Line

GLUE TRAP WITH FOOD BAIT FOR MONITORING AND CATCHING COCKROACHES AND OTHER CRAWLING INSECTS

Ready-to-use ecological trap with specific crumbled food base for professional monitoring of all species of cockroaches. It performs its action for a long time (3-4 weeks), is odorless, non-toxic, hygienic and is easily removed without leaving any residue.

The closure of the wings "house-shaped" avoid the dusting of the glue contained inside. If necessary, you can remove the wings to place the cardboard inside the container "Ristoratrap".

TARGET: *Blatta orientalis*, *Blattella germanica*, *Periplaneta americana*, *Supella longipalpa*.

Dimension: 19x10 cm

Also available with gel food base: 19x10 cm

Customizable with minimum lots of 10,000 pieces.

PACKAGE

Trap Line: box of 150 pcs.
CODE: 6-14-1-1X150

Trap Line Gel: box of 150 pcs.
CODE: 6-14-2-1X150

Trap Line (plastic with gel)

PLASTIC GLUE TRAP WITH GEL FOOD BAIT FOR MONITORING AND CATCHING COCKROACHES AND OTHER CRAWLING INSECTS

Ready-to-use ecological glue trap with food-grade gel bait. It performs its action for a long time (3-4 weeks), it is odorless, non-toxic, hygienic and is easily removed without leaving any residue. The closure of the wings "to house" serves to avoid the dusting of the glue contained within; ideal for being inserted inside of humid places or with strong presence of water.

TARGET: *Blatta orientalis*, *Blattella germanica*, *Periplaneta americana*, *Supella longipalpa*.

Dimension: 20x10x2,5 (h) cm

PACKAGE

Trap Line plastic with gel: box of 100 pcs.
CODE: 6-14-1X100

100I Insect trap

ADHESIVE GLUE BOARD FOR MONITORING AND CATCHING COCKROACHES AND OTHER CRAWLING INSECTS

Hazelnut flavored glueboard with food bait. If necessary, each card can be divided into three parts. The adhesive strip on the back allows optimal adhesion on all surfaces, both horizontal and vertical.

TARGET: *Blatta orientalis*, *Blattella germanica*, *Periplaneta americana*, *Supella longipalpa*.

Dimension: 19x19 cm

PACKAGE

100I Insect Trap: box of 100 pcs.
CODE: 6-16-100

TRAPS FOR BED BUGS MONITORING

Nattaro® Scout

BED BUG MONITORING SYSTEM

Drop trap that allows bugs to enter but not exit. The trap is activated with an aggregation pheromone that attracts both males and females. We recommend placing 2-4 traps next to the foot of the bed, on the floor or between the bed and mattress. Replace the pheromone after 2 weeks.

TARGET: Bed Bugs

APPLICATION FIELDS: Civil environments, homes.

PACKAGE

Nattaro® Scout with pheromone: box of 4 pcs
CODE: 6-56-NATSCOUTMIX

Nattaro® Scout only trap: box of 12 pcs
CODE: 6-56-NATSCOUTMON

Nattaro® Scout pheromone: box of 12 pcs
CODE: 6-56-NATSCOUTLURE

BDS-SLDR96 Slider™ Bedbug Monitor

FOR BED BUG MONITORING

Plastic trap to detect the presence of *Cimex lectularius* made of sturdy plastic equipped with a transparent lid for a proper verification of the catches. The lid also allows the layer of glue to be protected from possible dusting. It is equipped with side openings that facilitate the entrance to the insects. It can also be placed under mattresses.

Dimension: 6,9x5,08x1,59 (h) cm

TARGET: Bed Bugs

APPLICATION FIELDS: Civil environments, homes.

PACKAGE

BDS-SLDR96 Slider™ Bedbug Monitor: box of 96 pcs.
CODE: 6-16-BDS

BB Detector Plus

FOR BEDBUG MONITORING

Cardboard glue trap, to be activated with specific pheromone included in the package (aggregation pheromone). Mimics the signal that bed bugs emit. Pheromones are not sex-linked and attract both males and females.

INSETTI TARGET: Bed Bugs

APPLICATION FIELDS: Civil environments, homes.

PACKAGE

BB Detector Plus: box of 20 pcs + 20 pheromones.
CODE: 6-1772-17306

Bed Bugs Trap

FOR BED BUG MONITORING

Cardboard glue trap for detecting the presence of *Cimex lectularius*. Bed bugs are extremely difficult to manage and identify. To avoid heavy infestations it is necessary to detect the presence of the insect as early as possible. Bed Bugs Trap is a good tool to monitor their activity.

Open: 16x8,5 (h) cm
Close: 5,3x8,5 (h) cm

TARGET:
Bed Bugs

APPLICATION FIELDS:
Civil environments,
homes.

PACKAGE

Bed Bugs Trap: box of 60 pcs (6 flow pack of 10 pcs).
CODE: 6-14-3-1X60

Insectrac SP Tab

THE NEW FRONTIER OF SEXUAL CONFUSION:
SELF-CONFUSION (ACTIVE MATING DISRUPTION)

The Insectrac SP Tab system allows you to effectively control populations of *Plodia interpunctella* and *Ephestia* spp. by avoiding the use of chemical products applied either by spraying (spray, thermal foggers, ULV) or by fumigation with toxic or other inert gases.

Insectrac SP guarantees a constant protection (24/7) of environments and foodstuffs through the technique of SEXUAL AUTOCONFUSION. The proposed work protocol is compatible with all integrated pest management systems and meets the criteria of sustainability in Pest Management. Conventional sexual confusion techniques are based on the delivery of high concentrations of sexual pheromone through dispensers of various kinds placed in the environment concerned.

On the other hand, conventional monitoring allows verification of the number of insects caught in each trap. Insectrac SP Tab, on the other hand, is an innovative system that causes an automatic transfer of a "confusion effect" in the male lepidopteran population. Through this process of "contamination" of the male lepidopterans, each one acts as a "mobile dispenser" of pheromone. Thus, false trails are produced that attract other males, which in turn become contaminated by mutual contact. They also decrease their ability to locate females, greatly reducing the chances of mating. Therefore, the infestation is brought down to acceptable levels. In the unlikely event that some mating does occur, the delay from the optimal fertility period of the females results in a significant reduction of eggs produced.

Easy to use and install, these applications prevent the onset of resistance phenomena due to the massive use of insecticides; moreover, the treated environments are always accessible and do not involve risks of any kind for people and food.

The system is applicable in all food environments where *Plodia interpunctella* and *Ephestia* spp. infestations are present. The system will not kill the lepidoptera directly but will act on the life cycle, interfering negatively with mating.

TARGET: *Plodia interpunctella*, *Ephestia* spp.

APPLICATION FIELDS: Food industries

PACKAGE

Insectrac SP Tab: box of 96 pcs.
CODE: 6-2591-PT1150

Insectrac SP Tab dispenser Blue: box of 24 pcs.
CODE: 6-2591-PT1155

Pheromones

Packaged in aluminum bags, for the activation of traps for the monitoring and capture of pests such as Lepidoptera of food, of agro-forestry interest.

Food beetles, cockroaches, etc..

The activated pheromone is valid for 3 months.

Other types of pheromones not listed are also available

Why are Catchmaster Glues the best?

Because they've been manufactured for over 50 years exclusively by plants that already produce the best glues for the industry. Because Catchmaster glues contain high-quality components. They contain a special natural resin that gives the glues an advantage in adhesiveness. They are flavored. Release of the adhesive film is immediate and easy, reducing downtime and "accidents" of sticky fingers or broken film. They are tested daily in the most difficult conditions of use.

The Catchmaster line of glues is available in various formats and adapts to all professional pest control requirements.

Also...

GLUES ARE IMPORTANT I.P.M. COMPONENTS.

NON-TOXIC AND SAFE FOR FAMILY

ACTIVE UP TO ONE YEAR AFTER PLACEMENT

TYPE RECOGNITION OF INFESTANT

FAST ACTION, WITHOUT THE AID OF ATTRACTIVES

Some suggestions

- Place along pest walkways, in enclosed locations, or around pipes, in capture locations, and near pest entrances.
- For greater success eliminate food sources within the environment, both to attract the pest to the glues and to make it move more..
- Placing multiple glue stations ensures a greater likelihood of catching the pest.
- Leave the post without removing the film in the environment for a day or two so the pest can "get used to" the presence of the adhesive tablet.
- Secure the glues so they don't move.
- Prevent non-target animals from getting trapped in the glues.

150 MB / 150 RI

HAZELNUT FLAVOURED GLUEBOARD

Hazelnut flavored glueboard for monitoring and catching crawling insects and small rodents. If necessary, you can close the cards "in a little house" to prevent the glue from getting dusty.

TARGET: Mice, rats and crawling insects

Dimension: 17x9 cm

PACKAGE

150 MB: carton box of 150 pcs.

CODE: 6-16-150

150 RI: carton box of 150 pcs..

CODE: 6-16-150RI

72 MB / 72 MAX

FLAVORED GLUEBOARD

Professional glueboard for monitoring and catching mice and rats. The trap is coated with a wide layer of chocolate, cherry or peanut butter flavored glue that does not drip or dry out.

Available 4 cards with different weights of glue. Possibility of "little house" closure to preserve the glue from dust.

TARGET: Mice and Rats

Dimension: 21,5x13 cm (unfolded cardboard)

PACKAGE

72 MAX: carton box of 72 pcs of 4 lb

CODE: 6-16-72-MAX

72 MB: carton box of 72 pcs. of 4.5 lb.

CODE: 6-16-72

72 MB Extra: carton box of 72 pcs. of 5 lb.

CODE: 6-16-72-EXTRA

72 MB Super: carton box of 72 pcs of 6 lb

CODE: 6-16-72-SUPER

24 GRB

HAZELNUT FLAVOURED GLUEBOARD

Professional glueboard for monitoring and catching mice and rats. The cardboard is coated with a wide layer of hazelnut flavored glue. Inevitably attracts pests that get trapped inside the cardboard. Possibility of "house" closure to preserve the glue from dust. Can also be used in smaller sections if required.

TARGET: Mice and Rats

Dimension: 47x27 cm (unfolded cardboard)

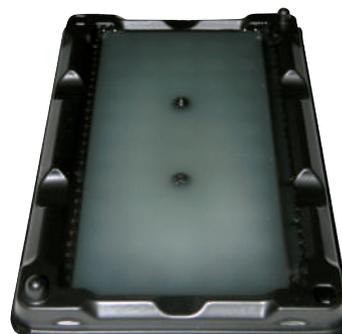

PACKAGE

24 GRB: carton box of 24 pcs.

CODE: 6-16-24GRB

96 M

PLASTIC GLUE TRAP

Adhesive trap, non-toxic, disposable, made of plastic for monitoring and capture of mice and rats of medium and small size.

Possibility to be inserted in containers for monitoring such as IRT BOX RAT CUPOLA, IRT MULTI TRAP UV PICCOLA. The trap consists of black tray and adhesive.

TARGET: Mice and Rats

Dimension: 13x8,5 cm

PACKAGE

96 M: carton box of 48 sets equal to 96 pcs.

CODE: 6-16-96

72 TC

ADHESIVE CARDBOARD FOR THE CAPTURE OF CRAWLING INSECTS AND SMALL RODENTS

Professional cardboard for monitoring and capturing small rodents and crawling insects. Possibility of positioning inside multi-catch traps for mice or single use. The card can also be closed "in a box", avoiding the accumulation of dust on the adhesive layer.

Inevitably attracts mice which become trapped within the cardboard.

 **TARGET:** Insects and Rodents

Dimension: 25,4 x 10,2 cm

PACKAGE

72 TC Tincat: carton box of 72 pcs.
CODE: 6-16-72-TC

48 WRG

PLASTIC GLUE TRAP EFFECTIVE AT LOW TEMPERATURE

Plastic glue trap for monitoring and catching mice and rats. Extremely resistant to low temperatures, it is effective down to -18° C, applicable in unheated rooms and cold stores. Cherry flavored.

 **TARGET:** Mice and Rats

Dimension: 13x25,5 cm

PACKAGE

48 WRG: carton box of 24 sets of 2 pcs.
CODE: 6-16-48WRG

60 RBGL

ADHESIVE GLUEBOARD HAZELNUT FLAVORED

Professional cardboard for monitoring and catching mice and rats. The cardboard is coated with a wide layer of hazelnut flavored glue.

It inevitably attracts mice that are trapped inside the cardboard.

 **TARGET:** Mice and Rats

Dimension: 30,8x15,2 cm

PACKAGE

60 RBGL: carton box of 60 pcs.
CODE: 6-16-60

Blu Tablet

MASONITE GLUE TRAPS

Adhesive traps, consisting of a rigid wooden support (masonite). The adhesive used remains unaltered at low temperatures, ensuring the capture of the pest regardless of environmental conditions. They are also suitable for the capture of crawling insects. They are particularly resistant and difficult to move even for large rats. Disposable traps, easy to dispose of after capture. Each set consists of 2 traps that can be used individually.

 **TARGET:** Mice, rats, crawling insects

Dimension Blu Tablet: 28x19 cm

Dimension Blu Tablet Mini: 14x19 cm

PACKAGE

Blu Tablet: carton box of 25 set of 2 pcs.
CODE: 6-14-1-1X25

Blu Tablet Mini: carton box of 50 set of 2 pcs.
CODE: 6-14-2-1X50

Rodent Stop Mini

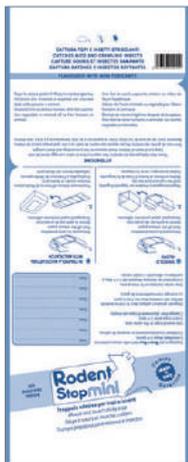

FLAVORED ADHESIVE CARDBOARD

Professional glueboard for monitoring and catching mice, rats and crawling insects.

The cardboard is coated with a wide layer of banana flavored glue. It inevitably attracts mice that get trapped inside the cardboard.

Placement inside multiple mouse traps or single use. Possibility of "house" closure to preserve the glue from dust.

 **TARGET:** Mice, rats, crawling insects.

Dimension: 25,4x10,2 cm (unfolded cardboard)

PACKAGE

Rodent Stop Mini: carton box of 140 pcs.
CODE: 12-15-420

Rodent Stop Mini (plastic): carton box of 100 pcs.
CODE: 12-14-421

Trap Guard™ 48TG

TUNNEL SUITABLE FOR DUSTY ENVIRONMENTS

Protective tunnel designed for very dusty environments. The tablet remains protected and effective even in the presence of flour residues or large amounts of dust.

Suitable for Catchmaster® adhesive tablets

150 MB / 150 RI (pag. 59), 72MB / 72 MAX (pag. 59), 72TC (pag. 60), 96M (pag. 59), 48 WRG (pag. 60), Rodent Stop Mini (pag. 61), Rodent Stop Universal (pag. 61), Glue Blue (pag. 61) and others on the market.

 **TARGET:** Mice and Rats

Dimension: 29,6 x 13,9 x 8,9 cm

PACKAGE

Trap Guard 48TG: box of 192 pcs.
CODE: 6-16-48TG

Rodent Stop Universal

FLAVORED ADHESIVE CARDBOARD

Professional glueboard for monitoring and catching crawling insects, mice and rats.

The cardboard is coated with a large layer of flavored glue. It inevitably attracts insects and mice that get trapped inside the cardboard. Possibility of "cottage" closure to preserve the glue from dust.

Complete with control calendar on the back. Compatible with Ristoratrap and other containers.

 **TARGET:** Mice, rats, crawling insects.

Dimension: 15,7x9,3 cm (unfolded cardboard)

PACKAGE

Rodent Stop Universal: carton box of 140 pcs.
CODE: 6-14-700

Rodent Stop Universal (plastic): carton box of 100 pcs.
CODE: 6-14-702

Glue Blu Mice / Rats

FLAVORED ADHESIVE TRAY

Plastic glue tray for monitoring and catching mice and rats. A large layer of flavored glue is coated in the tray. Two models are available Glue Blue Mice and Glue Blue Rats in addition to the tunnel to protect the glue from dust and to facilitate rodent entry. Each set consists of 2 trays that can be used individually.

 **TARGET:** Insects and Rodents

Dimension Glue Blu Mice: 12,6x12x0,5 (h) cm
Dimension Glue Blu Rats: 13x25x0,5 (h) cm

PACKAGE

Glue Blu Rats: box of 50 sets of 2 trays equal to 100 pcs.
CODE: 6-14-6-1X50

Tunnel Glue Blu Rats: carton box of 100 pcs.
CODE: 6-14-8-1X100

Glue Blu Mice: box in 50 sets of 4 trays, equal to 200 pcs.
CODE: 6-14-28-1X50

Tunnel Glue Blu Mice: carton package of 100 pcs.
CODE: 6-14-9-1X100

Rat / Mouse Snap Trap 621P / 605P

SNAP TRAPS

Model 621P is suitable for catching rats, model 605P is suitable for catching mice

Dimension 621P: 7,6x14x6,9 (h) cm

CODE: 12-142-ED105F

IRT ED Mice Bait Snaptrap UV: box of 96 pcs.
CODE: 12-142-ED106UV

IRT Box Mice UV / Black

DISPENSER FOR MONITORING DOMESTIC MOUSE

Rodenticide bait dispenser available in clear plastic or black plastic version. Closing by key. Suitable for the control of mice.

Dimension: 12,5x9,5x4 cm
Minimum customizable quantity: 400 pcs.
Carton Contents: 80 keys.

PACKAGE

IRT Box Mice UV: box of 80 pcs.
CODE: 12-142-ED102UV

IRT Box Mice Black: box of 84 pcs.
CODE: 12-142-ED101F

IRT Corner Fit Bait Box

MONITORING DISPENSER FOR DOMESTIC MOUSE

IRT Corner Fit Bait Box black

IRT Corner Fit Bait Box

Rigid triangular-shaped plastic container created to be placed even in corners, with safety lock. Waxed / pressed blocks can be inserted. Indispensable for professional use, indoors or outdoor. Ideal for fighting the house mouse (*Mus Musculus*). It protects the bait from bad weather and avoids accidental contact with people or animals.

Available in black or transparent version, to allow viewing immediate consumption of bait.

Dimension: 11,3x11,3x3,8 (h) cm
Minimum customizable quantity: 336 pcs.
Carton Contents: 1 key

PACKAGE

IRT Corner Fit Bait Box black: box of 112 pcs.
CODE: 12-142-SED-F

IRT Corner Fit Bait Box UV: box of 112 pcs.
CODE: 12-142-SED-UV

Roki Mouse Bait Box

DISPENSER FOR MONITORING HOUSE MOUSE

Polycarbonate container with safety closure. Possibility to insert rodenticides in paste or block. Indispensable for professional use, to be placed inside or outside buildings for the fight against the house mouse (*Mus Musculus*). It protects the baits from bad weather and avoids accidental contact with people or animals.

Dimension: 16x9x4 (h) cm
Minimum customizable quantity: 400 pcs.
Carton Contents: 100 keys.

PACKAGE

Roki Mouse Bait Box: box of 100 pcs.
CODE: 12-82-513

Sx One Rat

PLASTIC DISPENSER
FOR MONITORING MICE AND RATS

Water resistant container, ensures a longer life of the rodenticide baits placed inside. It has a side opening allowing for wall mounting. It can be used with bait in bulk, in sachets and in kerosene blocks or alternatively a snap trap can be housed.

Security key lock (three keys per box). Additional keys can be purchased separately.

TARGET: Mice and Rats

Dimension: 25x17x11,5 (h) cm

Minimum customizable quantity: 240 pz.

PACKAGE

Sx One Rat: box of 10 pcs.

CODE: 12-56-SXONE

Sx Key: box of 10 pcs.

CODE: 12-56-SXKEY

Rodent Top Rat 6010

POLYPROPYLENE DISPENSER
FOR MONITORING MICE AND RATS

Recycled Plastic
95%

Removable lid and on request, also transparent. Versatile and suitable for any type of rodenticide bait thanks to the removable internal tray for the use of fresh paste, flours, sachets, and the 3 safety pins for fixing the baits in a paraffined block. The dispenser is equipped with a plastic key in common with the mod. RODENT STOP EROGATORE.

TARGET: Mice and Rats

Dimension: 29x17,0x11,5 (h) cm

Minimum customizable quantity: 240 pz.

Carton Contents: 3 keys, 24 tie wraps, 24 large metal rods, 48 small metal rods.

PACKAGE

Rodent Top Rat 6010: box of 24 pcs.

CODE: 12-1206-1-1X24

Rodent Stop LP

PLASTIC DISPENSER
FOR MONITORING MICE AND RATS

Its trapezoidal shape, compact and low profile, allows placement in corners or along walls, externally along the perimeters of buildings and in production areas offering minimal visual impact and to easily fit under machinery or pallets. It is equipped with a locking system.

It can be used with any type of bait, but it is particularly suitable for the use of kerosene blocks which, thanks to the internal hooking bars (three vertical and one horizontal), are fixed to the dispenser and cannot come out.

TARGET: Mice and Rats

Dimension: 34x23x8,5 (h) cm

Minimum customizable quantity: 240 pz.

Carton Contents: 6 keys, 24 tie wraps, 6 large metal rods, 18 small metal rods.

PACKAGE

Rodent Stop LP: box of 6 pcs.

CODE: 12-1246-3-1X6

Sx Eco Guard

PLASTIC DISPENSER FOR THE CONTROL OF MICE AND RATS

Equipped with a key lock, its particular shape makes it suitable for corner placement. Inside it has a double lodging for the bait.

Can be used with loose bait, in sachets and in blocks. Possibility of inserting 96M adhesive glueboards.

TARGET: Mice and Rats

Dimension: 30x17x7 (h) cm

Minimum customizable quantity: 320 pz.

PACKAGE

Sx Eco Guard: box of 20 pcs.

CODE: 12-56-SXECO

Sx Eco Wall Bracket: box of 10 pcs..

CODE: 12-56-SXECOSTAFFA

New Traps in Bleu Line

Modular workstations - IRT BCOM modular line

When to use them?

BCOM IRT stations can be used for monitoring by using snap traps, adhesive cards or virtual baits or for control by inserting rodenticide baits inside them.

The stations are modular and versatile.

Rat Bait Black

Full box with black lid and rodenticide bait insert with 4 metal rods..

Dimension: 21 x 31.5 x 10.5 cm

Hole diameter: 5.5 cm

Each station is modular and can accommodate:

- Insert for rodenticide, with 4 metal rods (Bait Tray sold separately and featured in the IRT BCOM ModBox - Rat Bait Black).
- Insert for 2 large rat snap posts* (Rat Snaptrap Tray sold separately and found in the IRT BCOM ModBox - Rat Snaptrap UV).
- Insert for 2 small rat snap posts*.
- (Mice Snaptrap Tray sold separately).
- Rodent trapping glues (96 M).

You can change the way you manage or monitor your infestation without the need to disassemble or remove the dispenser.

* Snap traps not included in package

PACKAGE

IRT Box Rat Pallet UV Black

IRT Box Rat Pallet UV

Equipped with a double safety lock with the possibility of inserting paraffin-embedded rat blocks inside. It is available in the black version or with a transparent satin cover. It is also equipped with a removable tray that allows easy cleaning and sanitizing. To be placed inside or outside. Ideal for insertion under pallets/banks. It can be used with a glue tray as a monitoring station (see article 96 M).

TARGET: Mice and Rats

Dimension: 29,3x21,3x9 (h) cm

Minimum customizable quantity: 240 pz.

Carton Contents: 1 key, 1 feeder, 14 metal rods.

Glue trap not included.

PACKAGE

IRT Box Rat Pallet UV: box of 14 pcs.

CODE: 12-142-EA702UV

IRT Box Rat Pallet black: box of 14 pcs.

CODE: 12-142-EA701F

IRT wall fixing for box: box of 10 pcs.

CODE: 12-142-TAV101F

IRT Box Rat UV Cupola

PLASTIC DISPENSER FOR THE CONTROL OF MICE AND RATS

Container made of rigid plastic with double safety closure with possibility to insert inside rodenticide baits. Equipped with a removable tray for easy cleaning and sanitizing. To be placed inside or outside. It can be used with a glue tray as a monitoring station (item 96 M not included) or with IRT Large Snap Trap (code 12-142-PT401) to be placed in the appropriate housing.

TARGET: Mice and Rats

Dimension: 29,3x21,3x9 (h) cm (max height dome 9,7 cm)

Minimum customizable quantity: 240 pcs.

Carton Contents: 1 key, 1 feeder, 14 metal rods.

PACKAGE

IRT Box Rat UV Cupola: box of 12 pcs.

CODE: 12-142-EA704UV

IRT fissaggio a muro x box: box of 10 pcs.

CODE: 12-142-TAV101F

Rodent Stop Dispenser

TRAPEZOIDAL EROGATOR FOR TRAPPING MICE AND RATS

Recycled Plastic
95%

Weatherproof, for indoor and outdoor environments. The trapezoidal section shape allows any positioning, with minimum visual impact. Inside there is a multipurpose tray (feeder) suitable to accommodate any type of rodenticide bait (fresh paste, wax block, grains, etc.) Possibility of housing glue tray where the use of rodenticide is prohibited. On request also grey, green or transparent. Compatible glue boards: 72 TC, Rodent Stop Mini, Glue Blu Rats.

TARGET: Mice and Rats

Dimension: 33,2x14,2x11,2 cm (h)

Minimum customizable quantity: 240 pcs.

Carton Contents: 3 keys, 12 fixing ties, 12 large metal rods, 24 small metal rods. Supplied with anchor irons

PACKAGE

Rodent Stop dispenser 6001: box of 12 pcs.

CODE: 12-1206-2-1X12

Rodent Stop dispenser 6001 UV: box of 12 pcs.

CODE: 12-1206-2-1x12UV

Beta 2

DISPENSER IN PLASTIC MATERIAL FOR THE MONITORING OF MICE AND RATS

Equipped with double safety lock (without springs to help the opening) with the possibility of inserting blocks of rodenticide inside. Equipped with an accessory for wall mounting. It is also equipped with a removable tray that allows easy cleaning and sanitizing. Indispensable for professional use, to be placed inside or outside. It protects the bait from bad weather and avoids contact with people or animals while allowing the free movement of rats. Also available in the version with transparent lid.

TARGET: Mice and Rats

Dimension: 23x19x9,5 (h) cm

Minimum customizable quantity: 240 pz.

Carton Contents: 20 Keys, 20 Metal Rods, 20 Fasteners

PACKAGE

Beta 2: box of 20 pcs.

CODE: 12-1285-019-1X20

Beta 2 transparent: box of 20 pcs.

CODE: 12-1285-019-1X20T

IRT Rat Small Box UV / Black

POLYPROPYLENE DISPENSER FOR MONITORING OF MICE AND RATS

The bait dispenser is equipped with a safety lock with key and the possibility of inserting paraffin-embedded topical blocks inside. One of the advantages of this dispenser is the opening of the lid positioned on the short side, this allows you to open the dispenser without having to move it from the wall if it is anchored. It is possible to place a small snap trap in the housing. Fixing to wall or pole with plugs and screws or with a clamp. Available with black or transparent cover.

TARGET: Mice and Rats

Dimension: 22x14x8 cm

Minimum customizable quantity: 247 pz.

Carton Contents: 19 Containers, 1 Key, 19 Metal Rods

PACKAGE

IRT Rat Small Box Black: box of 19 pcs.

CODE: 12-142-PCOM101F

IRT Rat Small Box UV: box of 19 pcs.

CODE: 12-142-PCOM102UV

Ristoratrap

PLASTIC CONTAINER FOR THE MONITORING OF RODENTS AND CRAWLING INSECTS

Container suitable for carrying out not only rodent extermination but also rodent and crawling insect monitoring, thanks to the splittable base with two superimposed monitoring planes in which to insert also adhesive cards (150 MBGL, 150 RI and Rodent Stop Universal in the upper plane and Trap Line in the lower one). Also available in opaque/semi-transparent version.

TARGET: Blatte, Formiche, Roditori

Dimension: 22x14,5x6,5 (h) cm

Minimum customizable quantity: 240 pz.

Carton Contents: 12 keys, 12 feeders, 12 metal rods, 1 anchoring system Key lock (same key as Ristoramatic).

PACKAGE

Ristoratrap: box of 12 pcs.

CODE: 12-1168-1X12

Ristoratrap trasparente: box of 12 pcs.

CODE: 12-1169-1X12

Ristoramatic

PLASTIC DISPENSER FOR MONITORING OF MICE AND RATS IN THE SHAPE OF AN INVERTED "T"

Ristoramatic gray

Ristoramatic black

Extremely easy to install, does not occupy walkable surface, and is not accessible to children or pets.

Allows the use of Rat Block, fresh pasta sachets, kerosene sticks, etc. Equipped with loader and safety cap with key, and plugs for wall fixing; possibility of fixing to poles by means of clamps inside the spacers.

Ristoramatic has a safety cap with key and is available in gray and black. Suitable for the control of mice and rats.

TARGET: Mice and Rats

Vertical dispenser size:

37 (h) cm x 4,5 (Ø) cm

Horizontal tunnel dimensions:

24 cm (length) x 5,5 cm (diameter)

Minimum customizable quantity: 240 pcs.

Carton Contents:

10 wrenches, 10 chargers, 10 fixing clamps

PACKAGE

Ristoramatic gray: box of 10 pcs.

CODE: 12-946-2-1X10

Ristoramatic black: box of 10 pcs.

CODE: 12-946-1-1X10

Ristoramatic Grey cap: Single pcs.

CODE: 12-21-246T

Ristoramatic Black cap: Single pcs.

CODE: 12-21-246T-N

Ristoramatic Cable Tie: box of 2 pcs.

CODE: 12-21-246F

Ristoramatic Bait Rod: box of 50 pcs.

CODE: 12-21-246A

Ultra Bait Rat

GALVANIZED STEEL DISPENSER FOR MONITORING MICE AND RATS

Inside all components are made of plastic, removable for easy bait replacement and cleaning. Equipped with steel key lock.

Green in color to better blend in with the external environment. Suitable for the control of mice and rats.

Key not included. In case of purchase of six dispensers, a key will be provided free of charge. It can be anchored to the wall with a special L-shaped bracket, or to the ground with a fixing stake.

TARGET: Mice and Rats

Dimension: 21x32x12,5 (h) cm

PACKAGE

Ultra Bait Rat: Single pcs.

CODE: 12-95-100

Ultra Bait keys: Single pcs.

CODE: 12-95-100-KEY

Ultra Bait wall fixing: Single pcs.

CODE: 12-95-100F

Rodent Rock

PLASTIC DISPENSER WITH PECULIAR ROCK SHAPE FOR MONITORING MICE AND RATS

It can be placed in parks, gardens and other places where it is deemed necessary to camouflage the container in the environment.

It turns out to be extremely resistant to atmospheric conditions and to accidental shocks; it is equipped with a safety lock and it has inside several housings for rodenticide baits. The box includes metal rods and keys.

TARGET: Mice and Rats

Dimension: 33x29x19 (h) cm

PACKAGE

Rodent Rock arenaria: box of 4 pcs.
CODE: 12-1246-2-1X4

Rodent Rock mini

PLASTIC DISPENSER WITH PECULIAR ROCK SHAPE FOR MONITORING MICE AND RATS

It can be placed in parks, gardens and other places where it is deemed necessary to camouflage the container in the environment.

It turns out to be extremely resistant to atmospheric conditions and to accidental shocks; it is equipped with a safety lock and it has inside several housings for rodenticide baits. The box includes metal rods and keys.

TARGET: Mice and Rats

Dimension: 24x20x11 (h) cm

PACKAGE

Rodent Rock mini: box of 12 pcs.
CODE: 12-1285-200.102

IRT Multi-Function Bait Tunnel For Mouse Black

MULTIFUNCTIONAL CONTAINER FOR MONITORING AND CATCHING MICE IN POLYPROPYLENE

Available in the version with black lid, the container is made of weatherproof polypropylene, so it can be placed both indoors and outdoors.

It can be closed with a key included in the package and it is equipped with a bait stop rod. It is possible to place a 96M adhesive glueboard inside. It is also possible to place 2 IRT Small Snap Traps in the appropriate slots.

TARGET: Mice

Dimension: 29,7x8,7x9 (h) cm

Minimum customizable quantity: 240 pcs.

Catch traps and drip cards not included

PACKAGE

IRT Multi-Function Bait Tunnel For Mouse Black: box of 12 pcs.
CODE: 12-142-PA103F

IRT Multi-Function Bait Tunnel For Rats UV/Black

MULTIFUNCTIONAL CONTAINER FOR MONITORING AND CAPTURE OF MICE AND RATS IN POLYPROPYLENE

Available in the version with black or transparent lid, the container is equipped with double lock with key, removable tray and bait stop rod.

Possibility to place inside it a 72TC or Rodent Stop Mini glue card.

It is also possible to place 2 IRT Trap Small Snap or 2 IRT Trap Large Snap in the appropriate slots. The container is equipped with a special wall attachment with spacer that facilitates the opening.

TARGET: Mice and Rats

Dimension: 37x15,5x12 (h) cm

Weight: 475 g

Minimum customizable quantity: 240 pcs.

Catch traps and drip cards not included

PACKAGE

Irt multi-function bait tunnel for rats: box of 10 pcs..
CODE: 12-142-PA101F

Irt multi-function bait tunnel for rats transparent: box of 10 pcs.
