

Medical and Surgical Aid Health Ministry Registration n° 17757

**CONCENTRATED INSECTICIDE IN AQUEOUS MICROEMULSION FOR PROFESSIONAL USE IN CIVIL AND DOMESTIC FIELD AND INDUSTRIAL****Composition**

100 g product content:

Cypermethrin 4,90 g (51,6 g/l)

Pure pyrethrins 1,00 g (10,5 g/l)

Coformulants q.s. for 100 g

**Characteristics**

PYRECIP blu MICRO E is an insecticide in aqueous microemulsion with killing and flushing effect on account of its pyrethrins content and with residual action on account of cypermethrin. PYRECIP blu MICRO E is effective against crawling insects (cockroaches, ants, fleas, silverfish) and flying insects (flies, mosquitoes, sandflies, chironomids, wasps). PYRECIP blu MICRO E is also indicated for the disinfestation of hospital facilities, communities, barracks, houses, camping, tourist facilities, warehouses, storages, food industries (food must be kept away), agricultural and zootechnical buildings, farms (animals must be kept away), transport means and in the public hygiene (landfills, dumpsters, purifiers).

**Dosage and instructions for the use**

The product is dispersed in water in the which forms an emulsion according to the following doses. The obtained mixture is sprayed on the surfaces to be treated by means of suitable manual or mechanical equipment.

**Against flying insects** use 5 - 10 ml of product for 1 L of water. 1 L of solution is indicated for 11 m<sup>2</sup> of surface.

For treatment of green areas it is recommended to spray the vegetation evenly, avoiding any dripping.

**Against crawling insects** use 10 ml of product for 1 L of water. 1 L of solution is indicated for 11 m<sup>2</sup> of surface. In case of high infestation or for longer residual effect, dilute at the ratio of 2% (20 ml of product for 1 L of water). 1 L of solution is indicated for 11 m<sup>2</sup> of surface.

Against the fleas, the product must not be used on the animal, but the treatment concerns the place in which dogs or cats stay. Move the animals away during the whole treatment and wait until the solution is dry before letting them in again.
