## READY-TO-USE INSECTICIDE FOR PROFESSIONAL USE

### Composition

100 g product content:

Tetramethrin	1 g (8,9 g/l)
Piperonyl butoxide	4 g (35,6 g/l)
Co-formulants	q.s. for 100 g

### Characteristics

The product is ready-to-use. It is used against flying and crawling insects like mosquitoes, Asian tiger mosquitoes, flies, chironomids, fleas, simuliids, moths and crawling insects like cockroaches, ants, triboli.

### Field of application

FLY FOG can be used to effectively disinfest the following:

**Public health:** civil, industrial, agricultural and zootechnical buildings, urban agglomerates, suburban areas, homes, schools and kindergartens, gyms, barracks, cinemas, theatres, waiting rooms in stations and airports. Touristic resorts, camping sites. Cantines, hotels, restaurants. Hospitals, nursing homes, rest homes, etc. **Food industry:** treatments in warehouses and processing areas.

Tobacco industry: warehouses, cigarette production sites and tobacco stowage sites. Industrial sites in general. Port areas and equipment. **Means of transport:** railway carriages, tramways, buses, sea transport means.

The product can be used against mosquitoes in gardens, meadows, ornamental bushes, hedges and tree-lined roads

### Instructions and dosage

The product is ready-to-use and the dosage to be used is 1 litre every 2000 m<sup>3</sup> or 100 m<sup>2</sup> of surface. For outdoor treatments against mosquitoes it can be diluted with petroleum based solvent at 20-25% ratio and used with the suitable sprinklers or thermofoggers. Against fleas, the product must not be used on the animal but it has to be used in the environment where dogs or cats stay. Move the animals away during the whole treatment and wait until the solution is dry before letting them in again.
