

ELECTRIC PUMP WITH RECHARGEABLE LITHIUM BATTERY

Features

Shoulder pump equipped with 12 V DC 6 Ah 72 Watt rechargeable lithium batteries (fast charge) that allow treatments up to 15 hours max (0.5 bar), equipped with padded and adjustable shoulder straps. Polypropylene 12-liter tank with large hatch with integrated handle. The seals are made of NBR, resistant to high breaking loads.

The nozzles supplied are 2: in brass adjustable for spraying and in brass and fan-shaped acetal resin, ideal for covering large treatment surfaces evenly. With pressure regulator, on / off button with LED, easily accessible fuse.

News introduced with the Aquatain version

- Modular aluminum lance
- 60 ° curve and specific anti-drip to avoid dispersion of Aquatain AMF®
- Aluminum lances supplied with 70 cm, 50 and 35 cm
- Nozzle with 3-hole head inclination for the hopper light/window
- Specific 1-hole nozzle for gratings
